Practice Exam	IBM C2010-530 Certification Practice Exam

C2010-530 Syllabus:

Topic	Details	Weights
Planning	<ul style="list-style-type: none"> - Define the logical sequence of events for a successful Maximo installation - Explain the Java Enterprise Edition configuration concepts - Identify the functionality in IBM Maximo Asset Management that can be separated across Application Servers (JVMs) - Explain application server (JVM) performance concepts and optimization settings - Explain the database requirements and configuration - Identify initial configuration data and define proper input sequence - Explain the different security features and options available - Explain the IBM Maximo Asset Management upgrade process from 7.5 to 7.6 	12%
Installation and Upgrade	<ul style="list-style-type: none"> - Demonstrate the configuration of security needed to install IBM Maximo Asset Management - Demonstrate IBM Maximo Asset Management installation sequence - Prepare IBM Maximo Asset Management database schema - Prepare IBM Maximo Asset Management application server - Use the different IBM Maximo Asset Management installation components and tools - Demonstrate installation troubleshooting - Verify which version of IBM Maximo Asset Management has been installed - Validate the installation using the installValidation utility and the TPAE configuration tool - Validate middleware installation and configuration 	16%
System Level Configuration	<ul style="list-style-type: none"> - Enable Application Server Security - Configure the Maximo Integration Framework - Configure the IBM Maximo Asset Management system properties - Build and deploy Maximo EAR files - Configure Cron Tasks - Configure a Workflow Process - Configure IBM Maximo Asset Management logging - Configure the database objects - Create new or configure an existing application - Configure Conditional Expressions 	22%
Application Level Configuration	<ul style="list-style-type: none"> - Configure Item and Company Sets - Configure Organization and Site 	18%

Topic	Details	Weights
	<ul style="list-style-type: none"> - Configuration of the General Ledger (GL) component structure - Configure a Security Group - Describe the implementation of Automation Scripting - Configure Domains - Configure Start Center - Configure attached documents - Discuss the usage of Migration Manager and creation of Migration Packages - Identify the reporting options available and configuration tools 	
Administration	<ul style="list-style-type: none"> - Describe the Organization and Site settings - Administer Security Groups - Manage Administration Resources for Labor assignment - Manage Escalations - Manage Workflows - Administer Maximo Integration Framework - Use of Report Administration - Managing Adhoc Reports 	18%
Performance Tuning and Problem Determination	<ul style="list-style-type: none"> - Assess application server performance - Analyze database performance issues - Analyze query efficiency - Review Start Center portlets - Define IBM Maximo Asset Management log settings and analyze log files - Explain Diagnostic Tools 	14%

IBM C2010-530 Sample Questions:

Question: 1

A company has set up Maximo in a clustered environment with reporting servers.

A Maximo user runs a report and waits for the result. After a period of time a blank screen appears. The user determines that the report is timing out after sixty seconds.

What property must be changed?

- QueryTimeout in System Properties
- ReportTimeout in System Properties
- ServerIOTimeout in Web server plugin
- ConnectionTimeout in Web server plugin

Answer: c

Question: 2

A company would like to audit a field on a new custom object in Maximo. The Audit Enabled checkbox on the attribute in the Database Configuration application is read only.

What first step must be performed in order to audit this attribute?

- a) The attribute must be searchable.
- b) Auditing must be enabled on the object.
- c) The attribute must be E-Signature enabled.
- d) Auditing must be enabled in the system properties application.

Answer: b

Question: 3

A company has a large number of complex BIRT reports accessed by many users. An administrator wants to configure automatic cancellation of very large reports from processing once a configurable limit has been reached.

Which feature can be used to configure this?

- a) Report User Limits
- b) Report Server Limits
- c) Report Limit Cron Task
- d) Report Schedule Limits

Answer: b

Question: 4

An administrator has a requirement to prevent hacking and denial of service attacks and has enabled the system property mxe.sec.IPblock. An IP address will be blocked when which of the following occurs?

(Choose two.)

- a) Too many login attempts from the same address.
- b) Too many redirects occurring from the same address.
- c) Too many self-registration attempts from the same address.
- d) Too many successive keepalive packets received from the same address.
- e) The address is on the whitelist specified by the system property "mxe.sec.allowedIP".

Answer: a, c

Question: 5

A company wants to enable application import for the Asset application. What are the steps required?

(Choose two.)

- a) Enable the JMS queues for data import and export.
- b) Enable application import and export support for the ASSET object structure.
- c) Grant application import and export on the Asset application to the security group.
- d) Add the ASSET object structure to an enterprise service and add it to an external system.
- e) Modify the application XML to include the export and import buttons on the Asset application.

Answer: b, c

Question: 6

A company requires Maximo to own user and group creation but still authenticate against the directory server. Which system property can be set to achieve this functionality?

- a) mxe.LDAPUserMgmt
- b) mxe.AllowLDAPUsers
- c) mxe.LDAPGroupMgmt
- d) mxe.useAppServerSecurity

Answer: a

Question: 7

A company wishes to configure E-Signature within Maximo so that users must be re-authenticated when they change certain fields.

What must be configured for this to function?

- a) Auditing must be enabled.
- b) LDAP authentication must be used.
- c) E-Signature must be enabled in Application Designer.
- d) E-Signature must be flagged on the Attribute in the Database Configuration application.

Answer: d

Question: 8

A company has created an inactive Organization in Maximo which is scheduled for roll out in six months. What must be defined to the saved Organization before it can be activated?

- a) Item Set
- b) Currency
- c) Company Set
- d) Clearing Account

Answer: d

Question: 9

A company's users are seeing slow performance when they go to the Maximo Start Center. Which areas should be investigated?

(Choose two.)

- a) Escalations
- b) KPI definitions
- c) Report queries
- d) Workflow assignments
- e) Start Center Result Set portlets

Answer: b, e

Question: 10

A company is deploying Maximo and will have Integration Application Servers (JVMs). What is the function of these Application Servers (JVMs)?

- a) To process workflows.
- b) To process Cognos reports.
- c) To process inbound messages.
- d) To process Migration Manager packages.

Answer: c

Study Guide to Crack IBM Maximo Asset Management Infrastructure and Implementation C2010-530 Exam:

- Getting details of the C2010-530 syllabus, is the first step of a study plan. This pdf is going to be of ultimate help. Completion of the syllabus is must to pass the C2010-530 exam.
- Making a schedule is vital. A structured method of preparation leads to success. A candidate must plan his schedule and follow it rigorously to attain success.
- Joining the IBM provided training for C2010-530 exam could be of much help. If there is specific training for the exam, you can discover it from the link above.
- Read from the C2010-530 sample questions to gain your idea about the actual exam questions. In this PDF useful sample questions are provided to make your exam preparation easy.
- Practicing on C2010-530 practice tests is must. Continuous practice will make you an expert in all syllabus areas.

Reliable Online Practice Test for C2010-530 Certification

Make EduSum.com your best friend during your IBM Maximo Asset Management V7.6 Infrastructure and Implementation exam preparation. We provide authentic practice tests for the C2010-530 exam. Experts design these online practice tests, so we can offer you an exclusive experience of taking the actual C2010-530 exam. We guarantee you 100% success in your first exam attempt if you continue practicing regularly. Don't bother if you don't get 100% marks in initial practice exam attempts. Just utilize the result section to know your strengths and weaknesses and prepare according to that until you get 100% with our practice tests. Our evaluation makes you confident, and you can score high in the C2010-530 exam.
