## Discover More about the 1Z0-060 Certification

Are you interested in passing the Oracle 1Z0-060 exam? First discover, who benefits from the 1Z0-060 certification. The 1Z0-060 is suitable for a candidate if he wants to learn about Oracle Database. Passing the 1Z0-060 exam earns you the Oracle Database 12c Administrator Certified Professional(upgrade) title.

While preparing for the 1Z0-060 exam, many candidates struggle to get the necessary materials. But do not worry; your struggling days are over. The 1Z0-060 PDF contains some of the most valuable preparation tips and the details and instant access to useful 1Z0-060 study materials just at one [click](#).

## Oracle 1Z0-060 Upgrade Database Certification Details:

|                      |   |
|----------------------|---|
| Exam Name            | Upgrade to Oracle Database 12c  |
| Exam Code            | 1Z0-060   |
| Exam Price           | USD \$245 (Price may vary by country or by localized currency)  |
| Duration             | 120 minutes   |
| Number of Questions  | 80  |
| Passing Score        | Section 1 - 64%<br>Section 2 - 65%  |

# 1Z0-060 Syllabus:

| <b>New Features of Oracle Database 12c</b>                         |   |
|--|---|
| Enterprise Manager and Other Tools                                 | <ul style="list-style-type: none"> <li>- Use EM Express</li> <li>- Use OUI, DBCA for installation and configuration</li> </ul>  |
| Basics of Multitenant Container Database (CDB)                     | <ul style="list-style-type: none"> <li>- Identify the benefits of the multitenant container database</li> <li>- Explain root and multitenant architecture</li> </ul>                  |
| Configuring and Creating CDBs and PDBs                             | <ul style="list-style-type: none"> <li>- Create and configure a CDB</li> <li>- Create and configure a PDB</li> <li>- Migrate a non-CDB to a PDB database</li> </ul>                   |
| Managing CDBs and PDBs   | <ul style="list-style-type: none"> <li>- Establish connection to a CDB/PDB</li> <li>- Start up and shut down a CDB/PDB</li> <li>- Change instance parameters for a CDB/PDB</li> </ul> |
| Managing Tablespaces, Common and Local Users, Privileges and Roles | <ul style="list-style-type: none"> <li>- Manage tablespaces in a CDB/PDB</li> <li>- Manage users and privileges for CDB/PDB</li> </ul>  |
| Backup, Recovery and Flashback for a CDB/PDB                       | <ul style="list-style-type: none"> <li>- Perform backup of CDB and PDB</li> <li>- Perform recovery of CDB and PDB</li> <li>- Perform Flashback for a CDB</li> </ul>                   |
| Information Lifecycle Management and Storage Enhancements          | <ul style="list-style-type: none"> <li>- Use ILM features</li> <li>- Perform tracking and automated data placement</li> <li>- Move a data file online</li> </ul>                      |
| In-Database Archiving and Valid-Time Temporal                      | <ul style="list-style-type: none"> <li>- Differentiate between ILM and Valid-Time Temporal</li> <li>- Set and use Valid Time Temporal</li> <li>- Use In-Database archiving</li> </ul> |
| Auditing   | <ul style="list-style-type: none"> <li>- Enable and configure Unified Audit Data Trail</li> <li>- Create and enable audit policies</li> </ul>   |
| Privileges   | <ul style="list-style-type: none"> <li>- Use administrative privileges</li> <li>- Create, enable and use privilege analysis</li> </ul>  |
| Oracle Data Redaction  | <ul style="list-style-type: none"> <li>- Use and manage Oracle Data Redaction policies</li> </ul>   |

|   |  |
|---|--|
| RMAN and Flashback Data Archive   | <ul style="list-style-type: none"> <li>- Use RMAN enhancements</li> <li>- Implement the new features in Flashback Data Archive</li> </ul>  |
| Real-Time Database Operation Monitoring   | <ul style="list-style-type: none"> <li>- Implement real-time database operation monitoring</li> </ul>  |
| SQL Tuning  | <ul style="list-style-type: none"> <li>- Use Adaptive Execution Plans</li> <li>- Use enhanced features of statistics gathering</li> <li>- Use Adaptive SQL Plan Management</li> </ul>  |
| Emergency Monitoring, Real-Time ADDM, Compare Period ADDM, and Active Session History (ASH) Analytics | <ul style="list-style-type: none"> <li>- Perform emergency monitoring and real-time ADDM</li> <li>- Generate ADDM Compare Period</li> <li>- Diagnose performance issues using ASH enhancements</li> </ul>                          |
| Resource Manager and Other Performance Enhancements   | <ul style="list-style-type: none"> <li>- Use Resource Manager for a CDB and PDB</li> <li>- Explain Multi-process Multi-threaded Oracle architecture</li> <li>- Use Flash Cache</li> </ul>  |
| Index and Table Enhancements  | <ul style="list-style-type: none"> <li>- Use Index enhancements</li> <li>- Use Table enhancements</li> <li>- Use Online operation enhancements</li> </ul>  |
| ADR and Network Enhancements  | <ul style="list-style-type: none"> <li>- Explain ADR enhancements</li> </ul>   |
| Oracle Data Pump, SQL*Loader, External Tables and Online Operations Enhancements                      | <ul style="list-style-type: none"> <li>- Use Oracle Data Pump enhancements</li> <li>- Use SQL*Loader and External table enhancements</li> </ul>  |
| Partitioning Enhancements   | <ul style="list-style-type: none"> <li>- Explain Partitioning enhancements</li> <li>- Explain Index enhancements for partitioned tables</li> </ul>   |
| SQL Enhancements  | <ul style="list-style-type: none"> <li>- Use Oracle Database Migration Assistant for Unicode enhancements</li> <li>- Use Row limiting clause, and secure file LOBs enhancements</li> <li>- Configure extended datatypes</li> </ul> |

| <b>Key DBA Skills</b>  |   |
|------------------------|---|
| Core Administration    | <ul style="list-style-type: none"> <li>- Explain the fundamentals of DB architecture</li> <li>- Install and configure a database</li> <li>- Configure server and client network for a database</li> <li>- Monitor database alerts</li> <li>- Perform daily administration tasks</li> <li>- Apply and review patches</li> <li>- Back up and recover the database</li> <li>- Troubleshoot network and database issues</li> <li>- Detect and repair data failures with Data Recovery Advisor</li> <li>- Implement Flashback Technology</li> <li>- Load and Unload Data</li> <li>- Miscellaneous               <ol style="list-style-type: none"> <li>1. Relocate SYSAUX occupants</li> <li>2. Create a default permanent tablespace</li> <li>3. Use the Redo Logfile Size Advisor</li> <li>4. Use Secure File LOBs</li> <li>5. Use Direct NFS</li> </ol> </li> </ul> |
| Performance Management | <ul style="list-style-type: none"> <li>- Design the database layout for optimal performance</li> <li>- Monitor performance</li> <li>- Manage memory</li> <li>- Analyze and identify performance issues</li> <li>- Perform real application testing</li> <li>- Use Resource Manager to manage resources</li> <li>- Implement Application Tuning</li> </ul>   |
| Storage                | <ul style="list-style-type: none"> <li>- Manage database structures</li> <li>- Administer ASM</li> <li>- Manage ASM disks and diskgroups</li> <li>- Manage ASM instance</li> <li>- Manage VLDB</li> <li>- Implement Space Management</li> </ul>   |
| Security               | <ul style="list-style-type: none"> <li>- Develop and implement a security policy</li> <li>- Configure and manage auditing</li> </ul>  |

|  |   |
|--|---|
|  | <ul style="list-style-type: none"><li>- Create the password file</li><li>- Implement column and tablespace encryption</li></ul> |
|--|---|

## Broaden Your Knowledge with Oracle 1Z0-060 Sample Questions:

### Question: 1

You support Oracle Database 12c Oracle Database 11g, and Oracle Database log on the same server. All databases of all versions use Automatic Storage Management (ASM). Which three statements are true about the ASM disk group compatibility attributes that are set for a disk group?

- a) The ASM compatibility attribute controls the format of the disk group metadata.
- b) RDBMS compatibility together with the database version determines whether a database Instance can mount the ASM disk group.
- c) The RDBMS compatibility setting allows only databases set to the same version as the compatibility value, to mount the ASM disk group.
- d) The ASM compatibility attribute determines some of the ASM features that may be used by the Oracle disk group.
- e) The ADVM compatibility attribute determines the ACFS features that may be used by the Oracle 10g database.

**Answer: a, b, d**

### Question: 2

Which statement is true about Oracle Net Listener?

- a) It acts as the listening endpoint for the Oracle database instance for all local and non-local user connections.
- b) A single listener can service only one database instance and multiple remote client connections.
- c) Service registration with the listener is performed by the listener registration process (LREG) process of each database instance.
- d) The listener.ora configuration file must be configured with one or more listening protocol addresses to allow remote users to connect to a database instance.
- e) The listener.ora configuration file must be located in the ORACLE\_HOME/network/admin directory.

**Answer: c**

**Question: 3**

Which two statements are true regarding the count function?

- a) A select statement using the COUNT function with a DISTINCT keyword cannot have a where clause.
- b) Count (cust\_id) returns the number of rows including rows with duplicate customer IDs and NULL value in the CUST\_ID column.
- c) The count function can be used only for CHAR, VARCHAR2, and NUMBER data types.
- d) Count (distinct inv\_amt) returns the number of rows excluding rows containing duplicates and NULL values in the INV\_AMT column.
- e) Count (\*) returns the number of rows including duplicate rows and rows containing null value in any of the columns.

**Answer: d, e**

**Question: 4**

Which statement is true about Enterprise Manager (EM) express in Oracle Database 12c?

- a) By default, EM express is available for a database after database creation.
- b) You can use EM express to manage multiple databases running on the same server.
- c) You can perform basic administrative tasks for pluggable databases by using the EM express interface.
- d) You cannot start up or shut down a database Instance by using EM express.
- e) You can create and configure pluggable databases by using EM express.

**Answer: d**

**Question: 5**

Which two statements are true when the listener handles connection requests to an Oracle 12c database instance with multithreaded architecture enabled in UNIX?

- a) Each Oracle process runs an SCM thread.
- b) Each multithreaded Oracle process has an SCM thread.
- c) The local listener may pass the request to an existing process which in turn will create a thread.
- d) Thread creation must be routed through a dispatcher process.

**Answer: c, d**

**Question: 6**

Which statement is true regarding the default behavior of the order by clause?

- a) In a character sort, the values are case-sensitive.
- b) NULL values are not considered at all by the sort operation.
- c) Only those columns that are specified in the select list can be used in the order by clause.
- d) Numeric values are displayed from the maximum to the minimum value if they have decimal positions.

**Answer: a**

**Question: 7**

What is the result of executing a TRUNCATE TABLE command on a table that has Flashback Archiving enabled?

- a) It fails with the ORA-665610 Invalid DDL statement on history-tracked message.
- b) The rows in the table are truncated without being archived.
- c) The rows in the table are archived, and then truncated.
- d) The rows in both the table and the archive are truncated.

**Answer: c**

**Question: 8**

Which three activities are supported by the Data Recovery Advisor?

- a) Advising on block checksum failures
- b) Advising on inaccessible control files
- c) Advising on inaccessible block change tracking files
- d) Advising on empty password files
- e) Advising on invalid block header field values

**Answer: a, b, e**

**Question: 9**

Which normal form is a table in if it has no multi-valued attributes and no partial dependencies?

- a) Third normal form
- b) Fourth normal form
- c) Second normal form
- d) First normal form

**Answer: c**

**Question: 10**

In your multitenant container database (CDB) with two pluggable database (PDBs). You want to create a new PDB by using SQL Developer. Which statement is true?

- a) The CDB must be open.
- b) The CDB must be in the mount stage.
- c) The CDB must be in the nomount stage.
- d) All existing PDBs must be closed.

**Answer: a**

## Avail the Study Guide to Pass Oracle 1Z0-060 Upgrade Database Exam:

- Find out about the 1Z0-060 syllabus topics. Visiting the official site offers an idea about the exam structure and other important study resources. Going through the syllabus topics help to plan the exam in an organized manner.
- Once you are done exploring the [1Z0-060 syllabus](#), it is time to plan for studying and covering the syllabus topics from the core. Chalk out the best plan for yourself to cover each part of the syllabus in a hassle-free manner.
- A study schedule helps you to stay calm throughout your exam preparation. It should contain your materials and thoughts like study hours, number of topics for daily studying mentioned on it. The best bet to clear the exam is to follow your schedule rigorously.
- The candidate should not miss out on the scope to learn from the 1Z0-060 training. Joining the Oracle provided training for 1Z0-060 exam helps a candidate to strengthen his practical knowledge base from the certification.
- Learning about the probable questions and gaining knowledge regarding the exam structure helps a lot. Go through the [1Z0-060 sample questions](#) and boost your knowledge
- Make yourself a pro through online practicing the syllabus topics. 1Z0-060 practice tests would guide you on your strengths and weaknesses regarding the syllabus topics. Through rigorous practicing, you can improve the weaker sections too. Learn well about time management during exam and become confident gradually with practice tests.

## Career Benefits:

Passing the 1Z0-060 exam, helps a candidate to prosper highly in his career. Having the certification on the resume adds to the candidate's benefit and helps to get the best opportunities.

### Here Is the Trusted Practice Test for the 1Z0-060 Certification

DBExam.com is here with all the necessary details regarding the 1Z0-060 exam. We provide authentic practice tests for the 1Z0-060 exam. What do you gain from these practice tests? You get to experience the real exam-like questions made by industry experts and get a scope to improve your performance in the actual exam. Rely on DBExam.com for rigorous, unlimited two-month attempts on the [1Z0-060 practice tests](#), and gradually build your confidence. Rigorous practice made many aspirants successful and made their journey easy towards grabbing the Oracle Database 12c Administrator Certified Professional(upgrade).
