## Discover More about the 1Z0-062 Certification

Are you interested in passing the Oracle 1Z0-062 exam? First discover, who benefits from the 1Z0-062 certification. The 1Z0-062 is suitable for a candidate if he wants to learn about Oracle Database 12c. Passing the 1Z0-062 exam earns you the Oracle Database 12c Administrator Certified Associate title.

While preparing for the 1Z0-062 exam, many candidates struggle to get the necessary materials. But do not worry; your struggling days are over. The 1Z0-062 PDF contains some of the most valuable preparation tips and the details and instant access to useful 1Z0-062 study materials just at one [click](#).

## Oracle 1Z0-062 Database Administration Certification Details:

Exam Name	Oracle Database 12c - Administration
Exam Code	1Z0-062
Exam Price	USD \$245 (Price may vary by country or by localized currency)
Duration	120 minutes
Number of Questions	67
Passing Score	64%
Format	Multiple Choice Questions (MCQ)
Recommended Training	<a href="#">Oracle Database 12c: Administration Workshop</a> <a href="#">Oracle Database Learning Subscription</a> <a href="#">Unlimited Learning Subscription - All Technology</a>
Schedule Exam	<a href="#">Pearson VUE</a>
Sample Questions	<a href="#">Oracle Database 12c Administrator Certified Associate (OCA)</a>
Recommended Practice	<a href="#">1Z0-062 Online Practice Exam</a>

## 1Z0-062 Syllabus:

Exploring the Oracle Database Architecture	<ul style="list-style-type: none"> <li>- List the architectural components of Oracle Database</li> <li>- Explain the memory structures</li> <li>- Describe the background processes</li> </ul>
Oracle Database Management Tools	<ul style="list-style-type: none"> <li>- Use database management tools</li> </ul>
Oracle Database Instance	<ul style="list-style-type: none"> <li>- Understand initialization parameter files</li> <li>- Start up and shut down an Oracle database instance</li> <li>- View the alert log and access dynamic performance views</li> </ul>
Configuring the Oracle Network Environment	<ul style="list-style-type: none"> <li>- Configure Oracle Net Services</li> <li>- Use tools for configuring and managing the Oracle network</li> <li>- Configure client-side network</li> <li>- Configure communication between databases</li> </ul>
Administering User Security	<ul style="list-style-type: none"> <li>- Create and manage database user accounts</li> <li>- Grant and revoke privileges</li> <li>- Create and manage roles</li> <li>- Create and manage profiles</li> </ul>
Managing Database Storage Structures	<ul style="list-style-type: none"> <li>- Describe the storage of table row data in blocks</li> <li>- Create and manage tablespaces</li> </ul>
Create and manage tablespaces	<ul style="list-style-type: none"> <li>- Explain how Oracle database server automatically manages space</li> <li>- Save space by using compression</li> <li>- Use the Segment Advisor</li> <li>- Reclaim wasted space from tables and indexes by using the segment shrink functionality</li> </ul>
Managing Undo Data	<ul style="list-style-type: none"> <li>- Explain DML and undo data generation</li> <li>- Monitor and administer undo data</li> <li>- Describe the difference between undo data and redo data</li> <li>- Configure undo retention</li> </ul>
Managing Data Concurrency	<ul style="list-style-type: none"> <li>- Describe the locking mechanism and how Oracle manages data concurrency</li> <li>- Monitor and resolve locking conflicts</li> </ul>
Implementing Oracle Database Auditing	<ul style="list-style-type: none"> <li>- Enable standard database auditing and unified auditing</li> </ul>
Backup and Recovery Concepts	<ul style="list-style-type: none"> <li>- Identify the importance of checkpoints, redo log files, and archive log files</li> </ul>

Backup and Recovery Configuration	<ul style="list-style-type: none"> <li>- Configure the fast recovery area</li> <li>- Configure ARCHIVELOG mode</li> </ul>
Performing Database Backups	<ul style="list-style-type: none"> <li>- Create consistent database backups</li> <li>- Back up your database without shutting it down</li> <li>- Create incremental backups</li> <li>- Automate database backups</li> <li>- Manage backups</li> </ul>
Performing Database Recovery	<ul style="list-style-type: none"> <li>- Determine the need for performing recovery</li> <li>- Use Recovery Manager (RMAN) and the Data Recovery Advisor to perform recovery of the control file, redo log file and data file</li> </ul>
Moving Data	<ul style="list-style-type: none"> <li>- Describe ways to move data</li> <li>- Use SQL*Loader to load data from a non-Oracle database</li> <li>- Use external tables to move data via platform-independent files</li> <li>- Explain the general architecture of Oracle Data Pump</li> <li>- Use Data Pump Export and Import to move data between Oracle databases</li> </ul>
Performing Database Maintenance	<ul style="list-style-type: none"> <li>- Use server-generated alerts</li> </ul>
Managing Performance: SQL Tuning	<ul style="list-style-type: none"> <li>- Use the SQL Tuning advisor</li> </ul>
Automating Tasks by Using Oracle Scheduler	<ul style="list-style-type: none"> <li>- Use Oracle Scheduler to simplify management tasks</li> <li>- Use job chains to perform a series of related tasks</li> <li>- Use Scheduler jobs on remote systems</li> <li>- Use advanced Scheduler features to prioritize jobs</li> </ul>
Creating an Oracle Database Using DBCA	<ul style="list-style-type: none"> <li>- Generate database creation scripts by using DBCA</li> <li>- Manage database design templates by using DBCA</li> </ul>
Upgrading Oracle Database Software	<ul style="list-style-type: none"> <li>- Describe data migration methods</li> <li>- Describe the upgrade process</li> </ul>
Introduction to DBAAS	<ul style="list-style-type: none"> <li>- Recognize the difference between a DBaaS Instance and a Database Instance</li> <li>- Navigate with My Services Dashboard</li> <li>- User authentication and roles</li> <li>- Generate a Secure Shell (SSH) Public/Private Key Pair</li> </ul>

# Broaden Your Knowledge with Oracle 1Z0-062

## Sample Questions:

### Question: 1

You plan to create a database by using the Database Configuration Assistant (DBCA), with the following specifications: Applications will connect to the database via a middle tier.

The number of concurrent user connections will be high. The database will have mixed workload, with the execution of complex BI queries scheduled at night.

Which DBCA option must you choose to create the database?

- a) a default database configuration
- b) a General Purpose database template, with the shared server mode option and Automatic Memory Management (AMM) enabled
- c) a Data Warehouse database template, with the dedicated server mode option and AMM enabled
- d) a General Purpose database template with default memory allocation

**Answer: b**

### Question: 2

How can a table space be made larger?

- a) Convert it from a SMALLFILE tablespace to a BIGFILE tablespace.
- b) If it is a SMALLFILE tablespace, add files.
- c) If it is a BIGFILE tablespace, add more files.
- d) Resize the existing file(s).

**Answer: b, d**

### Question: 3

Which statement is true about the Log Writer process?

- a) It writes when it receives a signal from the checkpoint process (CKPT).
- b) It writes concurrently to all members of multiplexed redo log groups.
- c) It writes after the Database Writer process writes dirty buffers to disk.
- d) It writes when a user commits a transaction.

**Answer: d**

**Question: 4**

What is the smallest unit of storage in an ASM disk group?

- a) Database block
- b) OS block
- c) Allocation unit
- d) Smallest disk in the disk group

**Answer: c**

**Question: 5**

Is it possible for the unified audit trail to lose audit records?

- a) The unified audit trail is always protected in all circumstances.
- b) Records cannot be lost, but they can be deleted or modified with DML commands.
- c) The audit trail is protected against DML, but DDL (such as TRUNCATE) can lose records.
- d) It is possible for records to be lost in the event of an instance failure.

**Answer: d**

**Question: 6**

A consumer group object can be assigned to which of the following?

- a) A plan
- b) A subplan
- c) A consumer group
- d) None of the above

**Answer: a, b**

**Question: 7**

You want to start up the database using a binary initialization file. What is another name for this file?

- a) Configfile
- b) Pfile
- c) Spfile
- d) init\_pfile.ora

**Answer: c**

**Question: 8**

Which two tasks can be performed on an external table?

- a) partitioning the table
- b) creating an invisible index
- c) updating the table by using an update statement
- d) creating a public synonym
- e) creating a view

**Answer: d, e**

**Question: 9**

Which three factors influence the optimizer's choice of an execution plan?

- a) the optimizer\_mode initialization parameter
- b) operating system (OS) statistics
- c) cardinality estimates
- d) object statistics in the data dictionary
- e) fixed baselines

**Answer: a, c, d**

**Question: 10**

By default, how long will database statistics be retained in the AWR?

- a) 8 days
- b) 30 days
- c) 7 hours
- d) Indefinitely

**Answer: a**

## Avail the Study Guide to Pass Oracle 1Z0-062 Database Administration Exam:

- Find out about the 1Z0-062 syllabus topics. Visiting the official site offers an idea about the exam structure and other important study resources. Going through the syllabus topics help to plan the exam in an organized manner.
- Once you are done exploring the [1Z0-062 syllabus](#), it is time to plan for studying and covering the syllabus topics from the core. Chalk out the best plan for yourself to cover each part of the syllabus in a hassle-free manner.
- A study schedule helps you to stay calm throughout your exam preparation. It should contain your materials and thoughts like study hours, number of topics for daily studying mentioned on it. The best bet to clear the exam is to follow your schedule rigorously.
- The candidate should not miss out on the scope to learn from the 1Z0-062 training. Joining the Oracle provided training for 1Z0-062 exam helps a candidate to strengthen his practical knowledge base from the certification.
- Learning about the probable questions and gaining knowledge regarding the exam structure helps a lot. Go through the [1Z0-062 sample questions](#) and boost your knowledge
- Make yourself a pro through online practicing the syllabus topics. 1Z0-062 practice tests would guide you on your strengths and weaknesses regarding the syllabus topics. Through rigorous practicing, you can improve the weaker sections too. Learn well about time management during exam and become confident gradually with practice tests.

## Career Benefits:

Passing the 1Z0-062 exam, helps a candidate to prosper highly in his career. Having the certification on the resume adds to the candidate's benefit and helps to get the best opportunities.

## Here Is the Trusted Practice Test for the 1Z0-062 Certification

DBExam.com is here with all the necessary details regarding the 1Z0-062 exam. We provide authentic practice tests for the 1Z0-062 exam. What do you gain from these practice tests? You get to experience the real exam-like questions made by industry experts and get a scope to improve your performance in the actual exam. Rely on DBExam.com for rigorous, unlimited two-month attempts on the [1Z0-062 practice tests](#), and gradually build your confidence. Rigorous practice made many aspirants successful and made their journey easy towards grabbing the Oracle Database 12c Administrator Certified Associate.
