Oracle 1Z0-1060-22 Sample Questions:

Question: 1

You have created a description rule. When you try to select this description rule to be displayed as a header description rule in a journal entry rule set, you are not able to find this rule in the list of values. What is the possible reason for NOT finding the rule?

- a) The rule is built using a value set source.
- b) The rule is built using a line level source.
- c) The source does not return any value; therefore the rule is not displayed.
- d) The rule is built using a custom source.

Answer: b

Question: 2

While creating a journal entry rule set you are NOT able to use an account rule that was created recently. Which two reasons can explain this?

- a) The account rule is using sources that have not been assigned to the same event class that is associated to the journal entry rule set.
- b) The account rule is defined with conditions that are not allowing the assignment.
- c) The account rule does not return any valid account value.
- d) The account rule is defined with a different chart of accounts from the journal entry rule set.

Answer: a

Question: 3

To support foreign currency transaction in Accounting Hub, which accounting attributes must be assigned a source?

- a) Conversion type and conversion date
- b) Conversion type, conversion date and conversion rate
- c) Conversion type
- d) Conversion date and conversion rate

Answer: d

Question: 4

You need to build a complex account rule. Which four value types can you use in your definition?

- a) Value Set
- b) Constant
- c) Existing Account Rule
- d) Account Combination
- e) Mapping Set
- f) Source

Answer: b, c, e, f

Question: 5

What is a user job role data context assignment?

- a) Security privileges assignment to a user job role
- b) Security data role context assignment to a user job role
- c) Security data access context assignment to a user job role
- d) Duty role context assignment to a user

Answer: c

Question: 6

What can you override in a completed subledger journal entry?

- a) the supporting Information
- b) the account
- c) the descriptions
- d) the amounts

Answer: b

Question: 7

How do you enable diagnostics on subledger transaction sources?

- a) enable diagnostic profile
- b) enable diagnostic attribute
- c) enable diagnostic source
- d) enable transaction debug

Answer: a

Question: 8

A customer has a business requirement to provide additional information about subledger Journals that cannot be found in a predefined report.

How can you meet this requirement?

- a) Use either Account Monitor or Account Inspector to get required Information.
- b) Build a Financial Reporting Studio report that includes all dimensions.
- c) Build an OTBI analysis that includes a relevant subject area.
- d) Create a Smart View report using the query designer feature.

Answer: a

Question: 9

In the process of analyzing data from a source system you find that there are no reliable amounts that can be used to build a subledger journal entry.

How can you resolve this challenge?

- a) Use a custom formula in an account rule to derive amounts.
- b) Use a custom formula in a description rule to derive amounts.
- c) Use a custom formula in a journal line rule to derive amounts.
- d) Use a custom formula in a supporting reference to derive amounts.

Answer: d

Question: 10

You have been assigned to troubleshoot a Create Accounting error. What is the first step you need to take to use the diagnostics framework features?

- a) Run Create Accounting again to generate journal entries for the events that ended in error.
- b) Set the "SLA: Diagnostics Enabled" profile option.
- c) Submit the Accounting Event Diagnostics process.
- d) Run the Accounting Events Diagnostic Report.

Answer: b
