- e) port1 interface IP address is 192.168.1.99/24

Answer: a, c, e

Question: 2

When adding a new device using the model device option, which methods are available to link the model device to the real device?

- a) IP address and pre-shared key
- b) Model number and hostname
- c) Serial number and pre-shared key
- d) Hostname and certification authentication

Answer: c

Question: 3

In addition to the default ADOMs, an administrator has created a new ADOM named Training for FortiGate devices. The administrator sent a device registration to FortiManager from a remote FortiGate. Which one of the following statements is true?

- a) By default, the unregistered FortiGate will appear in the root ADOM.
- b) The FortiManager administrator must add the unregistered device manually to the unregistered device manually to the Training ADOM using the Add Device wizard
- c) The FortiGate will be added automatically to the default ADOM named FortiGate.
- d) The FortiGate will be automatically added to the Training ADOM.

Answer: a

Question: 4

In the event that the primary FortiManager fails, which action must be performed to return the FortiManager HA to a working state?

- a) The secondary device with highest priority will automatically be promoted to the primary role, and you must manually reconfigure all other secondary devices to point to the new primary device.
- b) Manually promote one of the secondary devices to the primary role, and reconfigure all other secondary devices to point to the new primary device.
- c) Reboot one of the secondary devices to promote it automatically to the primary role, and reconfigure all other secondary devices to point to the new primary device.
- d) FortiManager HA state transition is transparent to administrators and does not require any reconfiguration.

Answer: b

Question: 5

You are moving managed FortiGate devices from one ADOM to a new ADOM. Which statement correctly describes the expected result?

- a) Any pending device settings will be installed automatically.
- b) Any unused objects from a previous ADOM are moved to the new ADOM automatically.
- c) The shared policy package will not be moved to the new ADOM.
- d) Policy packages will be imported into the new ADOM automatically.

Answer: d

Question: 6

Which two items are included in the FortiManager backup?

(Choose two.)

- a) FortiGuard database
- b) Global database
- c) Logs
- d) All devices

Answer: b, d

Question: 7

An administrator configures a new firewall policy on FortiManager and has not yet pushed the changes to the managed FortiGate. In which database will the configuration be saved?

- a) Device-level database.
- b) Revision history database.
- c) ADOM-level database.
- d) Configuration-level database.

Answer: c

Question: 8

What configuration setting for FortiGate is part of a device-level database on FortiManager?

- a) VIP and IP Pools
- b) Firewall policies
- c) Security profiles
- d) Routing

Answer: d

Question: 9

How does FortiManager determine if a managed device Sync Status is Out-of-Sync?

- a) It compares the device-level database with the FortiGate configuration.
- b) It compares the provisioning template with the FortiGate configuration.
- c) It compares the current revision history with the FortiGate configuration.
- d) It compares the ADOM-level database with the FortiGate configuration.

Answer: c

Question: 10

As a result of enabling FortiAnalyzer features on FortiManager, which of the following statements is true?

- a) FortiManager will reboot
- b) FortiManager will send the logging configuration to the managed devices so the managed devices will start sending logs to FortiManager
- c) FortiManager will enable ADOMs automatically to collect logs from non-FortiGate devices.
- d) FortiManager can be used only as a logging device.

Answer: a
