Know Your 1Y0-440 Certification Well:

The 1Y0-440 is best suitable for candidates who want to gain knowledge in the Citrix Networking. Before you start your 1Y0-440 preparation you may struggle to get all the crucial CCE-AppDS materials like 1Y0-440 syllabus, sample questions, study guide.

But don't worry the 1Y0-440 PDF is here to help you prepare in a stress free manner.

The PDF is a combination of all your queries like-

- What is in the 1Y0-440 syllabus?
- How many questions are there in the 1Y0-440 exam?
- Which Practice test would help me to pass the 1Y0-440 exam at the first attempt?

Passing the 1Y0-440 exam makes you Citrix Certified Expert - App Delivery and Security (CCE-AppDS). Having the CCE-AppDS certification opens multiple opportunities for you. You can grab a new job, get a higher salary or simply get recognition within your current organization.

Citrix 1Y0-440 CCE-AppDS Certification Details:

Exam Name	Architecting a Citrix Networking Solution (CCE-AppDS)
Exam Code	1Y0-440
Exam Price	\$300 USD
Duration	150 minutes
Number of Questions	64
Passing Score	65%
Recommended Training / Books	CNS-420: Citrix Networking Assessment, Design, and Advanced Configuration
Schedule Exam	PEARSON VUE
Sample Questions	Citrix 1Y0-440 Sample Questions
Recommended Practice	Citrix Certified Expert - App Delivery and Security (CCE-AppDS) Practice Test

1Y0-440 Syllabus:

Section	Objectives	Weight
Networking Methodology and Assessment	<ul style="list-style-type: none"> - Use the Citrix Methodology to plan projects. - Identify/Prioritize Business Drivers and Requirements. - Determine how to Segment users into defined use cases. - Determine key Application Assessment and Categorization. - Determine how to perform Capabilities Assessment. 	11%
Citrix ADC Deployment Architecture and Topology	<ul style="list-style-type: none"> - Determine the appropriate Multi-Site Deployments design. - Determine how to design Multi Tennant Infrastructure. - Determine how to analyze Citrix Cloud design. 	14%
Advanced Authentication and Authorization	<ul style="list-style-type: none"> - Determine how to review Configuration components for AAA - Determine how to evaluate the Authentication Process and options - Determine Session Management with AAA - Determine how to utilize and implement MultiFactor (nFactor) Authentication 	21%
Citrix ADC Security	<ul style="list-style-type: none"> - Determine how to evaluate the Authorization configuration options - Determine the End Point Analysis Considerations - Define the correct protection against specific Layer 4-7 attacks 	12%
VPN Configuration	<ul style="list-style-type: none"> - Determine how to evaluate VPN Access Scenarios and Configuration. - Determine how to Configure split tunneling and Authorization. - Determine RDP Proxy Configuration - Determine ICA Proxy Considerations 	12%
Advanced Traffic Management	<ul style="list-style-type: none"> - Determine how to implement Advanced Load Balancing setup - Determine how to Implement Advanced Global Server Load Balancing setup 	11%
Citrix Application Delivery Management Automation and Orchestration	<ul style="list-style-type: none"> - Determine how to use Citrix Application Delivery Management for Citrix ADC Automation - Determine how to assess the Orchestration ability - Determine how to utilize NITRO - Determine how to create Stylebooks 	19%

Citrix 1Y0-440 Sample Questions:

Question: 1

Scenario: A Citrix Architect needs to deploy a Citrix ADC for Workspacelab, which will provide application load balancing services to Partnerlab and Vendorlab.

The setup requirements are as follows:

- A pair of Citrix ADC MPX appliances will be deployed in the DMZ network.
- High Availability will be accessible on the Citrix ADC MPX in the DMZ Network.
- Load Balancing should be performed for the mail servers for Partnerlab and Vendorlab.
- Separate Management accounts must be available for each client.
- VLAN 120 must be used for data traffic of Vendorlab, and VLAN 150 must be used for the data traffic of Partnerlab.

- VLAN 160 must be used for the client-side traffic and must be shared between the partitions.

Which set of commands meets this requirement?

- a) add vlan 160
bind partition Vendorlab vlan 160
set vlan 160 sharing ENABLED
bind partition Partnerlab vlan 160 Hosted VDI
- b) add vlan 160 sharing ENABLED
bind partition Vendorlab vlan 160
bind partition Partnerlab vlan 160
- c) add vlan 160
bind partition Vendorlab vlan 160
set vlan 160 sharing ENABLED
bind partition Partnerlab vlan 160
- d) add vlan 160 sharing ENABLED
switch partition Vendorlab
bind partition Vendorlab vlan 160
switch partition Partnerlab
bind partition Partnerlab vlan 160

Answer: b

Question: 2

Which HTTP request method can a Citrix Architect utilize to send the API NITRO call to modify the attributes of an entity in the Citrix ADC configuration?

- a) GET
- b) POST
- c) PUT
- d) HEAD

Answer: c

Question: 3

Under which two circumstances will a service be taken out of the slow start phase with automated slow start?

(Choose two.)

- a) The service does NOT receive traffic for three successive increment intervals.
- b) The server request rate parameters are set above 25 requests per second.
- c) The actual request rate is slower than the new service request rate.
- d) The percentage of traffic that the new service must receive is greater or equal to 50.
- e) The request rate has been incremented 100 times.

Answer: a, c

Question: 4

Which three methods can a Citrix Architect use to assess the capabilities of a network infrastructure?

(Choose three.)

- a) Review existing monitoring solutions for periods of latency, lost packets, and insufficient bandwidth.
- b) Map the location of the users against the existing network topology.
- c) Alter firewall rules of existing network to fit into the new Citrix ADC Deployment.
- d) Examine the topology for single points of failure and potential bottlenecks.
- e) Ensure that users and computers are in the correct organizational units (OUs).

Answer: a, b, d

Question: 5

Which four load-balancing methods support Citrix ADC Virtual Server-Level Slow Start?

(Choose four.)

- a) URLHash
- b) Least response time
- c) Least Packets
- d) Least Connection
- e) Token
- f) Least bandwidth
- g) SRCIPSRCPORTHash

Answer: b, c, d, f

Question: 6

A Citrix Architect can execute a configuration job using a DeployMasterConfiguration template on a Citrix ADC _____ deployed _____.

(Choose the correct option to complete sentence.)

- a) CPX; as part of a high availability pair
- b) CPX; as a stand alone device
- c) SDX; with less than 6 partitions and dedicated management interface
- d) MPX; as part of the cluster but Cluster IP is NOT configured
- e) SDX; with no partitions as a stand alone device

Answer: c

Question: 7

Scenario: A Citrix Architect has implemented two high availability pairs of Citrix 5500 MPX and MPX 11500 respectively with 12.0.53.13 nc version. The Citrix ADC devices are set up to handle Citrix ADC Gateway, Load Balancing, Application Firewall, and Content Switching.

The Workspacelab infrastructure is set up to be monitored with Citrix Application Delivery Management version 12.0.53.13 nc by the Workspacelab administrators. The Workspacelab team wants to implement one more pair of Citrix ADC MPX devices 7500 with version 12.0.53.13 nc.

The Citrix consulting team has assigned the task to implement these Citrix ADC devices in the infrastructure and set them up to be monitored and managed by Citrix Application Delivery Management.

The following are the requirements that were discussed during the project initiation call:

- Citrix Application Delivery Management should be configured to get the infrastructure information under sections such as HDX Insight, WEB Insight, and Security Insight.
- Configuration on the new MPX devices should be identical to that of MPX 11500 devices.
- Configuration changes after the deployment and initial setup should be optimized using Citrix Application Delivery Management.
- Citrix Application Delivery Management should be utilized to configure templates that can be utilized by Workspacelab team in future deployments.
- As per the requirement from Workspacelab team, Citrix Application Delivery Management should store the audited data for only 15 days.

Which configuration setting should the consultant configure to ensure that the audited data is NOT stored for more than 15 days?

- a) System Prune settings
- b) Syslog Prune settings
- c) mps afdecoder logs to prune data after 15 days
- d) mps analytics logs to prune data after 15 days

Answer: a

Question: 8

Which step does a Citrix Architect need to ensure during the define phase when following the Citrix Methodology?

- a) Testing steps were integrated.
- b) The project manager agrees with road map timelines.
- c) A phased roll out was completed.
- d) Existing networking infrastructure is ready.
- e) The redundancy deployment decision was made.

Answer: e

Question: 9

What can help a Citrix Architect prepare to discuss time scales and resource requirements?

- a) Creating a high-level project plan.
- b) Meeting with each member of the project team to assign tasks.
- c) Designing the new environment.
- d) Setting expectations with the project's key stakeholders.
- e) Identifying challenges associated with the project.

Answer: a

Question: 10

Which two features are supported on LBaaSv1?

(Choose two.)

- a) Cookie Insertion
- b) Layer 7 Load Balancing
- c) Certificate Bundle
- d) Layer 4 Load balancing
- e) Server Name Indicator

Answer: d, e

Study Guide to Crack Citrix CCE-AppDS 1Y0-440 Exam:

- Getting details of the 1Y0-440 syllabus, is the first step of a study plan. This pdf is going to be of ultimate help. Completion of the syllabus is must to pass the 1Y0-440 exam.
- Making a schedule is vital. A structured method of preparation leads to success. A candidate must plan his schedule and follow it rigorously to attain success.
- Joining the Citrix provided training for 1Y0-440 exam could be of much help. If there is specific training for the exam, you can discover it from the link above.
- Read from the 1Y0-440 sample questions to gain your idea about the actual exam questions. In this PDF useful sample questions are provided to make your exam preparation easy.
- Practicing on 1Y0-440 practice tests is must. Continuous practice will make you an expert in all syllabus areas.

Reliable Online Practice Test for 1Y0-440 Certification

Make VMExam.com your best friend during your Architecting a Citrix Networking Solution exam preparation. We provide authentic practice tests for the 1Y0-440 exam. Experts design these online practice tests, so we can offer you an exclusive experience of taking the actual 1Y0-440 exam. We guarantee you 100% success in your first exam attempt if you continue practicing regularly. Don't bother if you don't get 100% marks in initial practice exam attempts. Just utilize the result section to know your strengths and weaknesses and prepare according to that until you get 100% with our practice tests. Our evaluation makes you confident, and you can score high in the 1Y0-440 exam.
