## Know Your 1Z0-1093-21 Certification Well:

The 1Z0-1093-21 is best suitable for candidates who want to gain knowledge in the Oracle Database Cloud Service. Before you start your 1Z0-1093-21 preparation you may struggle to get all the crucial Cloud Database Services Specialist materials like 1Z0-1093-21 syllabus, sample questions, study guide.

But don't worry the 1Z0-1093-21 PDF is here to help you prepare in a stress free manner.

The PDF is a combination of all your queries like-

- What is in the 1Z0-1093-21 syllabus?
- How many questions are there in the 1Z0-1093-21 exam?
- Which Practice test would help me to pass the 1Z0-1093-21 exam at the first attempt?

Passing the 1Z0-1093-21 exam makes you Oracle Cloud Database Services 2021 Certified Specialist. Having the Cloud Database Services Specialist certification opens multiple opportunities for you. You can grab a new job, get a higher salary or simply get recognition within your current organization.

## Oracle 1Z0-1093-21 Cloud Database Services Specialist Certification Details:

<b>Exam Name</b>	Oracle Cloud Database Services 2021 Specialist
<b>Exam Code</b>	1Z0-1093-21
<b>Exam Price</b>	Free (This offer will end on December 31, 2021 11:59PM GMT.)
<b>Duration</b>	90 minutes
<b>Number of Questions</b>	55
<b>Passing Score</b>	68%
<b>Format</b>	Multiple Choice Questions (MCQ)
<b>Recommended Training</b>	<a href="#">Oracle Database Cloud Administrator 2021 Certified Associate</a> <a href="#">Oracle Database Cloud Administrator 2021 Certified Professional</a>

	<a href="#"><u>Oracle Cloud Database Services 2021 Certified Specialist</u></a>
<b>Schedule Exam</b>	<a href="#"><u>Pearson VUE</u></a>
<b>Sample Questions</b>	<a href="#"><u>Oracle Cloud Database Services 2021 Certified Specialist (OCS)</u></a>
<b>Recommended Practice</b>	<a href="#"><u>1Z0-1093-21 Online Practice Exam</u></a>

## 1Z0-1093-21 Syllabus:

Oracle Cloud Platform for Database in the Cloud	<ul style="list-style-type: none"> <li>- Describe Oracle Cloud Platform for Database in the Cloud</li> <li>- Describe Oracle Cloud Infrastructure Strategy (OCI)</li> </ul>
DB Systems BM/VM	<ul style="list-style-type: none"> <li>- Explain the VM Cloud Service Architecture (Compute/Storage/Networking/Innterconnects/ supported database editions and versions)</li> <li>- Monitor Bare Metal and Virtual Machine (BM/VM) DB Sytems</li> <li>- Create a VM Cloud Service and the components needed (options/networking/shapes/expansion/etc) for Automatic Storage Management (ASM) and Logical Volume Manager (LVM)</li> <li>- Manage the Database VM Cloud Service Lifecycle (Expansion/Scaling/state/patching infra/GI)</li> <li>- Manage the Database Lifecycle (patching/homes/move/backup/restore)</li> <li>- Configure/Deploy Maximum Availability Architecture (MAA) and Data Guard for DB Systems BM/VM</li> <li>- Use the DB Systems BM/VM command-line interface (dbcli, OCI CLI)</li> </ul>
Exadata Cloud Service	<ul style="list-style-type: none"> <li>- Explain the Exadata Cloud Service (Architecture/ database editions and versions)</li> <li>- Explain the Database Lifecycle management (patching/homes/move/backup/restore) (old 6.1, 9.1, 11.x)</li> <li>- Explain Exadata Cloud Service and the components needed (options/networking/shapes/expansion/etc)</li> <li>- Manage the Exadata Cloud Service Lifecycle (Expansion/Scaling/state/patching infra/GI)</li> <li>- Configure Maximum Availability Architecture (MAA) and Data Guard for Exadata Cloud Service</li> <li>- Describe the Exadata Cloud Service command-line interface (ExaCLI, dbaascli, OCI CLI)</li> <li>- Explain monitoring options with Exadata Cloud Service</li> </ul>
Exadata Cloud at Customer (ExaCC)	<ul style="list-style-type: none"> <li>- Describe the Infrastructure of Exadata Cloud at Customer (OCI overview, Exadata Infrastructure, control planes,</li> </ul>

	<p>networking)</p> <ul style="list-style-type: none"> <li>- Create VM Clusters (pre-requisites and policies, create/edit vm cluster, CPU scaling)</li> <li>- Create and manage Oracle Homes (OH): pre-requisites and policies, OH versions and options (shared/non-shared), create and manage dbs, db connections/monitoring</li> <li>- Describe Backup and Recovery (backup destinations, backup options, recovery options)</li> <li>- Explain Patch and upgrade (CLI and UI options, operations; analyze, apply and switchback, manual patching)</li> <li>- Explain the deployment of Autonomous Database on ExaCC (autonomous clusters, autonomous CDBs, autonomous PDBs)</li> </ul>
MySQL Database Service and HeatWave Technical Overview	<ul style="list-style-type: none"> <li>- Describe the MySQL Database Service</li> <li>- Manage MySQL Database</li> <li>- Provision and connect to MySQL Database</li> <li>- Monitor MySQL Database</li> <li>- Set up Backup for MySQL Database Service</li> <li>- Describe performance considerations for the MySQL Database Service</li> <li>- Create, manage and use HeatWave</li> </ul>
NoSQL Database Cloud Service	<ul style="list-style-type: none"> <li>- Explain connecting to the NoSQL Database Cloud service</li> <li>- Explain table security management</li> <li>- Explain table rate limiting</li> <li>- Describe NoSQL data models</li> <li>- Explain provisioned throughput for NoSQL Database Cloud Service</li> <li>- Describe NoSQL language SDKs</li> </ul>
Oracle Cloud Infrastructure Database Management Service	<ul style="list-style-type: none"> <li>- Describe the Oracle Cloud Infrastructure Database Management Service</li> <li>- Install and configure Management Agent</li> <li>- Register External Databases &amp; enable and use Database Management</li> <li>- View Fleet Summary and Management features</li> <li>- Use Database Groups and Jobs</li> </ul>

## Oracle 1Z0-1093-21 Sample Questions:

### Question: 1

The /u02 directory containing Oracle Homes (OH) is 80% utilized and you need to free up space in it. you own two Oracle Homes (OH193\_A and OH193\_B), each with a test database (193A and 193B respectively).

You decide to consolidate both databases into a single Oracle Home (OH193. |\_A) to free up space. Which TWO actions must you perform?

(Choose all correct answers)

- a) Copy the sqnet.ora file from OH193\_B to OH193\_A.
- b) use the Move Database option from the console.
- c) Schedule a downtime window with the Test teams who use the 193B database.
- d) Create a new container under OH193B and migrate the pluggable databases (PDBs) from 193B to 193A.

**Answer: b, c**

### Question: 2

What information is required to connect to the NoSQL Database Cloud Service?

- a) API signing key, admin ID, user ID
- b) tenancy ID, passphrase, handshake key
- c) signing key fingerprint, API signing key, tenancy OCID
- d) user ID, tenancy ID, component ID

**Answer: c**

### Question: 3

What THREE steps must you perform to connect to a MySQL database in the database system by using SSH and MySQL Shell?

- a) Connect to the MySQL Database Service instance.
- b) Instantiate MySQL Shell on the MySQL database system instance.
- c) Start MySQL Shell on the compute instance.
- d) SSH into the compute instance from your local machine.
- e) Add an ingress rule for port 20.

**Answer: a, b, d**

**Question: 4**

How many DB systems must you provision before you can enable Oracle Data Guard for a virtual machine DB system database?

- a) Three, first for the primary database, second for the standby database, and a third for the staging database in the Oracle Data Guard configuration.
- b) Two for both the primary and standby database, because a DB system with the database that you want to use as the standby must already exist before you enable Oracle Data Guard.
- c) One with the primary database, because a new DB system with the standby database is created and associated with the primary database when you enable Oracle Data Guard.
- d) It depends on how many standby databases you want for your primary database in the Oracle Data Guard configuration in Oracle Cloud Infrastructure.

**Answer: c**

**Question: 5**

In addition to the automatic backup of your Oracle Database associated with a database deployment, you are planning to take an on-demand backup of a database on Exadata Cloud Service.

How do you do this?

- a) Use the Create Backup button in the backup section of the Database Details page.
- b) Disable the automatic backup configuration and then take an on-demand backup.
- c) Perform a recovery operation to a specific long-term backup.
- d) First connect to the Exadata Cloud Instance as the oracle user and then take a backup.

**Answer: a**

**Question: 6**

You want to permanently delete the DB System and its attached HeatWave cluster. Which action should you perform?

- a) Terminate the DB system and drop the associated HeatWave Cluster.
- b) Drop the DB system and terminate the associated HeatWave Cluster.
- c) Delete the Heatwave Cluster and it will also delete the DB system.
- d) Delete the DB system and it will also delete the attached HeatWave Cluster.

**Answer: d**

**Question: 7**

After you have provisioned a virtual machine (VM) database (DB) system, what action can you take to meet changes in block storage requirements?

- a) Only bare metal DB systems can increase block storage at any time without impacting the system.
- b) If a vm DB system requires more block storage, increase the storage at any time without impacting the system.
- c) If a vm DB system has different requirements for block storage, increase or decrease the storage at any time without impacting the system.
- d) After you have provisioned a VM DB system, you cannot increase or decrease block storage.

**Answer: b**

**Question: 8**

Which FOUR storage options are available in Oracle Cloud Infrastructure (OCI)?

(Choose all correct answers)

- a) EBS Storage
- b) EFS Storage
- c) Local storage
- d) Block Storage
- e) File Storage
- f) Object Storage

**Answer: c, d, e, f**

**Question: 9**

Which is NOT a prerequisite for patching Grid Infrastructure or database homes when using the console?

- a) Oracle Clusterware is down on the VM cluster.
- b) All database compute nodes of the VM cluster are up and running.
- c) The required patch is available on the Control Plane server.
- d) The /uo1 directory on the database host file system has at least 15 GB of free space for the execution of Patching processes.

**Answer: a**

**Question: 10**

You enable automatic backups on your Exadata Cloud@Customer.?

- a) database control files
- b) server parameter file (SP file)
- c) Transparent Data Encryption (TDE) keystore (wallet)
- d) database archivelog files

**Answer: c**

## Study Guide to Crack Oracle Cloud Database Services Specialist 1Z0-1093-21 Exam:

- Getting details of the 1Z0-1093-21 syllabus, is the first step of a study plan. This pdf is going to be of ultimate help. Completion of the syllabus is must to pass the 1Z0-1093-21 exam.
- Making a schedule is vital. A structured method of preparation leads to success. A candidate must plan his schedule and follow it rigorously to attain success.
- Joining the Oracle provided training for 1Z0-1093-21 exam could be of much help. If there is specific training for the exam, you can discover it from the link above.
- Read from the 1Z0-1093-21 sample questions to gain your idea about the actual exam questions. In this PDF useful sample questions are provided to make your exam preparation easy.
- Practicing on 1Z0-1093-21 practice tests is must. Continuous practice will make you an expert in all syllabus areas.

## Reliable Online Practice Test for 1Z0-1093-21 Certification

Make DBExam.com your best friend during your Oracle Cloud Database Services 2021 Specialist exam preparation. We provide authentic practice tests for the 1Z0-1093-21 exam. Experts design these online practice tests, so we can offer you an exclusive experience of taking the actual 1Z0-1093-21 exam. We guarantee you 100% success in your first exam attempt if you continue practicing regularly. Don't bother if you don't get 100% marks in initial practice exam attempts. Just utilize the result section to know your strengths and weaknesses and prepare according to that until you get 100% with our practice tests. Our evaluation makes you confident, and you can score high in the 1Z0-1093-21 exam.
