Which backup data must the administrator select to restore all the data present on the volume at the moment the last available incremental backup ran?

a) the last full and every following incremental set using the point-in-time option
b) the last full and last incremental set using the from a backup set option
c) only the last incremental set, using the from a backup set option
d) only the last incremental set, using the to a point-in-time option

Answer: d

Question: 3

An Active Directory domain includes six domain controllers. One of the domain controllers crashed due to a power surge.

Which Backup Exec method should an administrator use to recover the failed domain controller without affecting the other domain controllers?

a) Authoritative restore
b) restore the domain controller as a read only domain controller
c) Non-Authoritative restore
d) restore using Ntdsutil

Answer: c

Question: 4

Which two options can be selected from the Database Maintenance settings in Backup Exec?

(Select two.)

a) optimize database performance
b) perform database validation
c) perform database consistency check
d) optimize database size
e) perform database tuning

Answer: c, d

Question: 5

The Agent for Microsoft Active Directory is able to restore individual objects and attributes for which two components?

(Select two.)

a) Active Directory Application Mode (ADAM)
b) Microsoft Group Policy Objects (GPO)
c) Active Directory Lightweight Directory Services (AD LDS)
d) Read-Only Domain Controller (RODC)
e) Active Directory Windows Management Instrumentation (WMI) Repository

Answer: a, c

Question: 6

Which database application is installed by default during a Backup Exec installation?

a) SQLite
b) SQL Express
c) Jet DB Engine
d) MySQL

Answer: b

Question: 7

Which kind of storage destination is managed through media sets?

a) disk cartridge storage
b) tape storage
c) cloud storage
d) deduplication storage

Answer: b

Question: 8

How does Backup Exec communicate with Hyper-V hosts?

a) through the Agent for Windows locally installed to the Hyper-V host server
b) using secure communication methods over the HTTPS protocol
