Discover More about the MB-700 Certification

Are you interested in passing the Microsoft MB-700 exam? First discover, who benefits from the MB-700 certification. The MB-700 is suitable for a candidate if he wants to learn about Microsoft Dynamics 365. Passing the MB-700 exam earns you the Microsoft Certified - Dynamics 365 Finance and Operations Apps Solution Architect Expert title.

While preparing for the MB-700 exam, many candidates struggle to get the necessary materials. But do not worry; your struggling days are over. The MB-700 PDF contains some of the most valuable preparation tips and the details and instant access to useful [MB-700 study materials just at one click](#).

Microsoft MB-700 Finance and Operations Apps Solution Architect Certification Details:

Exam Name	Microsoft Certified - Dynamics 365 Finance and Operations Apps Solution Architect Expert
Exam Code	MB-700
Exam Price	\$165 (USD)
Duration	120 mins
Number of Questions	40-60
Passing Score	700 / 1000
Books / Training	Course MB-700T00: Microsoft Dynamics 365: Finance and Operations Apps Solution Architect
Schedule Exam	Pearson VUE
Sample Questions	Microsoft Finance and Operations Apps Solution Architect Sample Questions
Practice Exam	Microsoft MB-700 Certification Practice Exam

MB-700 Syllabus:

Topic	Details
Architect solutions (20-25%)	
Gather requirements	<ul style="list-style-type: none"> - identify operational and organizational challenges that may affect a business - identify existing business processes and opportunities to optimize business processes - gather information about expected transaction volume - categorize business requirements and perform gap fit analyses - review and validate business requirements throughout the solution lifecycle
Define the solution architecture	<ul style="list-style-type: none"> - map business requirements to functional components - evaluate whether to build versus buy for selected business requirements - identify opportunities to integrate other Microsoft technologies - select the appropriate implementation tools including LCS and Azure DevOps - describe the Success by Design process - create solution architecture diagrams
Describe and document the solution blueprint	<ul style="list-style-type: none"> - define an organization including company information, locations, and structure - document the implementation timeline including roll-out strategies - define the business process catalog and document solution gaps - define instances, environments, and solution components - develop a disaster recovery strategy - identify required security roles
Define solution strategies (35-40%)	
Select a deployment strategy	<ul style="list-style-type: none"> - develop a process to manage solution code and deployment

Topic	Details
	<ul style="list-style-type: none"> - select a deployment model and identify instances and environments required for the selected deployment model - describe the One Version strategy for Dynamics 365 and the effects of One Version on solutions - segment solution development and delivery into logical phases - provide alternative methodologies and approaches for deploying modifications - determine solution maintenance cadence and timelines - identify upgrade scenarios and select appropriate tools
Define an application lifecycle management (ALM) strategy	<ul style="list-style-type: none"> - define a code management and data flow strategy - define a Microsoft Power Platform solution management strategy - determine which build automation capabilities to implement - define a roll-back strategy for solution code and data
Determine a data management strategy	<ul style="list-style-type: none"> - differentiate between transactional and historical data - define data quality and data validation process - define data cleansing and transformation strategies - define data dependencies - develop a data migration strategy for master, transactional, reference, parameter, and document data entities - develop data cut-over and data retention plans
Define the security architecture	<ul style="list-style-type: none"> - differentiate between Azure, Dynamics 365, and infrastructure security - describe Azure and infrastructure security-related elements - describe use cases for and capabilities of record-level and role-based security in Dynamics 365
Define the integration architecture	<ul style="list-style-type: none"> - select an integration pattern including OData, Microsoft Power Platform, Batch Data API, Azure Data Lake, Business events, and Dual-write - identify required integration and interface details

Topic	Details
	<ul style="list-style-type: none"> - design integrations - define an integration testing strategy
Define the business intelligence and reporting architecture	<ul style="list-style-type: none"> - gather business intelligence and reporting requirements - define data sources required to meet business intelligence and reporting requirements - select appropriate business intelligence and reporting tools including Power BI, organizational workspaces, financial reports, SQL Server Reporting Services (SSRS), and the Electronic Reporting tool - define printing requirements including Print management, Document Routing Agent (DRA), modern report design layout templates, check printing, and label printing
Manage implementations (20-25%)	
Describe Lifecycle Services (LCS) tools	<ul style="list-style-type: none"> - understand the use cases and capabilities of different LCS tools - understand the use cases and capabilities Business Process Modeler (BPM) - understand the use cases and capabilities LCS Methodologies - create a usage profile to describe current or projected usage
Manage interactions with FastTrack	<ul style="list-style-type: none"> - identify the value proposition for FastTrack - identify FastTrack engagement types and personnel roles - describe typical types of FastTrack workshops and the inputs for each workshop - describe go-live checklist elements
Determine support options	<ul style="list-style-type: none"> - develop a support plan and strategy - define post-go-live support plans including response times and service-level agreements (SLAs) - describe use cases and capabilities for the LCS Support tool
Determine licensing requirements	<ul style="list-style-type: none"> - determine the types of licenses required - estimate the number of licenses required by using the License Sizing estimator

Topic	Details
	- describe the process for estimating ongoing software licensing costs
Manage testing (10-15%)	
Define a testing strategy	<ul style="list-style-type: none"> - define a testing strategy that includes all required types of testing - define a regression testing strategy - identify opportunities for automated testing - review use cases and test coverage for business scenarios - determine when to use RSAT, SysTest, Postman, ATL, Azure DevOps Test Plans, and other tools
Define a performance testing strategy	<ul style="list-style-type: none"> - define performance goals and requirements - identify performance monitoring and testing tools - define performance benchmarks and success criteria - design a performance and load testing strategy - troubleshoot performance issues

Broaden Your Knowledge with Microsoft MB-700 Sample Questions:

Question: 1

A company implements Dynamics 365 for Finance and Operations. You have a requirement that the component data for address structure in the system be available in Portuguese (Brazil).

You need to provide address and contact information purpose with translation. What should you do?

- Under Organization administration, on the Global addresses tab, enter the appropriate translation value in the translations form
- In User options, set the language preference to Portuguese pt-BR and enter addresses for customers and vendors
- Upload files to Dynamics 365 Translation Services (DTS) for conversion
- Apply return from Dynamics 365 Translation Services (DTS) to the system by submitting a support ticket

Answer: a

Question: 2

You are planning to implement Dynamics 365 Finance. Accountants in your organization need to be able to enter multiple lines into payment journals. You need to recommend a tool for expediting data entry. What should you recommend?

- a) Use the desktop version of Microsoft Excel to use the Excel Data Connector app.
- b) Use Microsoft Excel online to use the Excel Data Connector app.
- c) Use an aggregate data entity to expose data to the Microsoft Excel Data Connector app.
- d) Use the Data migration tool.

Answer: a

Question: 3

A local bookstore plans to offer online ordering with in-store pickup by using a third-party e-commerce site. Credit card authorizations are required for online sales.

You need to recommend options to ensure that customers who place online orders are not charged until the merchandise is picked up in the store.

What are three possible ways to achieve this goal?

Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- a) Pass a credit card token from Dynamics 365 Retail POS to e-commerce.
- b) Pass sales data from e-commerce to Dynamics 365 Finance.
- c) Configure Dynamics 365 Finance and Dynamics 365 Retail.
- d) Replace e-commerce with a link to Dynamics 365 Retail POS so users can enter their own credit card data.
- e) Pass a credit card token from e-commerce to Dynamics 365 Retail POS.

Answer: b, c, e

Question: 4

You need to recommend a solution for tracking business process test steps. What should you recommend?

- a) Data Migration Framework
- b) Microsoft Azure DevOps
- c) Microsoft SharePoint
- d) Selenium Automation Framework

Answer: b

Question: 5

A company is implementing a new Dynamics 365 cloud deployment. The stakeholders need to confirm that performance testing meets their expectations. The single-user rest procure-to-pay scenario is complete.

You need to successfully complete the multi-user load test. Which tool should you recommend?

- a) Microsoft Azure DevOps
- b) Microsoft Dynamics Lifecycle Services
- c) PerfSDK
- d) Visual Studio

Answer: c

Question: 6

A client has a third-party warehouse management system. Data from the system must be integrated with Dynamics 365 Finance in near real-time. You need to determine an integration solution. Which two solutions should you recommend?

Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- a) OData
- b) Batch data API processed daily
- c) Data management
- d) Business events

Answer: a, d

Question: 7

You need to manage the roles and responsibilities for security and financial management to address concerns found in the prior year's audit. What should you do?

- a) Use security roles with segregation of duties.
- b) Implement a security group for all users in finance department
- c) Use security roles with audit workbench.
- d) Grant multiple security roles per user.

Answer: a

Question: 8

You need to recommend a solution to manage the wine bottle label requirements for the private brand. What should you recommend?

- a) Recommend Dynamics 365 Retail.
- b) Create notes on the item and print for the customers.
- c) Use an add-on solution for barcode and label report printing.
- d) Implement Advanced Warehouse label printing.

Answer: c

Question: 9

You need to ensure that the customer records remain synchronized in both systems. What should you recommend?

- a) Write a Power BI report.
- b) Integrate the third-party application into Dynamics 365 Finance
- c) Replace the sales system with Dynamics 365 Sales.
- d) Use Microsoft Power Automate

Answer: b

Question: 10

You need to recommend an appropriate implementation methodology. Which methodology should you recommend?

- a) Spiral
- b) Lean
- c) Waterfall
- d) Agile

Answer: d

Avail the Study Guide to Pass Microsoft MB-700 Finance and Operations Apps Solution Architect Exam:

- Find out about the MB-700 syllabus topics. Visiting the official site offers an idea about the exam structure and other important study resources. Going through the syllabus topics help to plan the exam in an organized manner.
- Once you are done exploring the [MB-700 syllabus](#), it is time to plan for studying and covering the syllabus topics from the core. Chalk out the best plan for yourself to cover each part of the syllabus in a hassle-free manner.
- A study schedule helps you to stay calm throughout your exam preparation. It should contain your materials and thoughts like study hours, number of topics for daily studying mentioned on it. The best bet to clear the exam is to follow your schedule rigorously.
- The candidate should not miss out on the scope to learn from the MB-700 training. Joining the Microsoft provided training for MB-700 exam helps a candidate to strengthen his practical knowledge base from the certification.
- Learning about the probable questions and gaining knowledge regarding the exam structure helps a lot. Go through the [MB-700 sample questions](#) and boost your knowledge
- Make yourself a pro through online practicing the syllabus topics. MB-700 practice tests would guide you on your strengths and weaknesses regarding the syllabus topics. Through rigorous practicing, you can improve the weaker sections too. Learn well about time management during exam and become confident gradually with practice tests.

Career Benefits:

- Passing the MB-700 exam, helps a candidate to prosper highly in his career. Having the certification on the resume adds to the candidate's benefit and helps to get the best opportunities.

Here Is the Trusted Practice Test for the MB-700 Certification

EduSum.Com is here with all the necessary details regarding the MB-700 exam. We provide authentic practice tests for the MB-700 exam. What do you gain from these practice tests? You get to experience the real exam-like questions made by industry experts and get a scope to improve your performance in the actual exam. Rely on EduSum.Com for rigorous, unlimited two-month attempts on the **[MB-700 practice tests](#)**, and gradually build your confidence. Rigorous practice made many aspirants successful and made their journey easy towards grabbing the Microsoft Certified - Dynamics 365 Finance and Operations Apps Solution Architect Expert.
