## NetApp NCHC Architect Certification Questions & Answers

---

Exam Summary – Syllabus – Questions

**NS0-603**

**NetApp Certified Hybrid Cloud Architect**

**60 Questions Exam – 80% Cut Score – Duration of 120 minutes**

# Table of Contents:

# Know Your NS0-603 Certification Well:

The NS0-603 is best suitable for candidates who want to gain knowledge in the NetApp Cloud Architect. Before you start your NS0-603 preparation you may struggle to get all the crucial NCHC Architect materials like NS0-603 syllabus, sample questions, study guide.

But don't worry the NS0-603 PDF is here to help you prepare in a stress free manner.

The PDF is a combination of all your queries like-
- What is in the NS0-603 syllabus?
- How many questions are there in the NS0-603 exam?
- Which Practice test would help me to pass the NS0-603 exam at the first attempt?

Passing the NS0-603 exam makes you NetApp Certified Hybrid Cloud Architect. Having the NCHC Architect certification opens multiple opportunities for you. You can grab a new job, get a higher salary or simply get recognition within your current organization.

# NetApp NS0-603 NCHC Architect Certification Details:

| Exam Name | Hybrid Cloud Architect |
|---|---|
| Exam Code | NS0-603 |
| Exam Price | $150 USD |
| Duration | 120 minutes |
| Number of Questions | 60 |
| Passing Score | 80% |
| Recommended Training | **Cloud volumes ONTAP fundamentals** |
| Exam Registration | **PEARSON VUE** |
| Sample Questions | **NetApp NS0-603 Sample Questions** |
| Practice Exam | **NetApp Certified Hybrid Cloud Architect Practice Test** |

# NS0-603 Syllabus:

| Section | Objectives |
|---|---|
| Customer Requirements | - Demonstrate knowledge of identifying customer requirements for hybrid cloud<br>- Describe cloud cost management considerations<br>- Demonstrate knowledge of using the NetApp Hybrid Cloud |
| NetApp Hybrid Cloud Solutions | - Demonstrate knowledge of the NetApp Hybrid Cloud Storage portfolio<br>- Demonstrate knowledge of the NetApp Public Cloud Services portfolio<br>- Demonstrate knowledge of the NetApp Cloud Controls portfolio |
| Hybrid Cloud Architecture | - Demonstrate knowledge of the architectural components |
| Business Continuity and Data Protection | - Demonstrate knowledge of designing for availability<br>- Demonstrate knowledge of designing for durability |
| Networking | - Demonstrate knowledge of hybrid cloud network topologies<br>- Describe networking requirements for NetApp Hybrid Cloud solutions |
| Sizing | - Demonstrate knowledge of how to scale NetApp Hybrid Cloud solutions<br>- Describe sizing workload characteristics for different business requirements |
| Security | - Describe security considerations for a NetApp Hybrid Cloud environment<br>- Describe how to secure NetApp Hybrid Cloud control planes |
| Monitoring | - Demonstrate knowledge of what should be monitored in a NetApp Hybrid Cloud solution |

# NetApp NS0-603 Sample Questions:

Question: 1

Which NetApp Cloud Manager feature would be enabled to support Immutability of the data?

a) NetApp Cloud WORM
b) NetApp Storage Encryption
c) NetApp Snapshot
d) NetApp Volume Encryption

**Answer: b**

## Question: 2

Your customer requires a centralized repository of media files. The repository will be large (in petabytes), with content creators and editors using It from around the globe. They want a NetApp solution that requires minimal administrative resources and provides a good user experience.

In this scenario, which two NetApp technologies would satisfy these requirements?

(Choose two.)

    a) FlexCache
    b) Flash Cache
    c) SnapMirror
    d) FlexGroup

**Answer: a, b**

## Question: 3

A customer wants to migrate workloads to Cloud Volumes ONTAP. In this scenario, which two test cases would you design in your proof of concept to demonstrate the solution?

(Choose two.)

    a) test HA resiliency
    b) test FCoE
    c) test storage efficiencies
    d) test RAID DP

**Answer: b, c**

## Question: 4

You are migrating your on-premises Microsoft SQL Server to Microsoft Azure VMs and Azure NetApp Files. You want to avoid connectivity interruptions during scheduled maintenance operations. Which Azure NetApp Files feature satisfies this requirement?

    a) Manual QoS Capacity Pool
    b) Azure Application Consistent Snapshot Tool (AzAcSnap)
    c) Snapshot Revert
    d) SMB Continuously Available shares

**Answer: b**

## Question: 5

Which two domain service providers are supported for authentication of Azure NetApp Files SMB shares?

(Choose two.)

a) Azure Active Directory Domain Services (AADDS)
b) Azure Active Directory External Identities
c) Active Directory Domain Services (ADDS)
d) Azure Active Directory (Azure AD)

**Answer: b, d**

## Question: 6

A company realizes that multiple departments are using different cloud providers for mission-critical workloads.

They are experiencing poor performance on workloads across different cloud providers and notice that there are deployment inconsistencies. In this scenario, what are two ways to correct the problem?

(Choose two.)

a) Use infrastructure as code (IaC) to ensure deployments satisfy design specifications.
b) Use storage services that can scale dynamically with workload demands.
c) Consolidate data for applications into volumes on a single cloud provider.
d) Ensure that all virtual machines use Reserved Instances to maximize performance.

**Answer: b, c**

## Question: 7

A customer is using AWS for their production environment. One of their applications uploads data into an AWS S3 bucket and the customer wants to duplicate this data into NetApp Cloud Volumes ONTAP. In this scenario, how would the customer copy their data from AWS S3 to Cloud Volumes ONTAP?

a) Use Cloud Backup service.
b) Use SaaS Backup.
c) Use Cloud Tiering.
d) Use Cloud Sync service.

**Answer: b**

## Question: 8

You must back up data with an option to restore a file to the same or a different location. In this scenario, which storage type would be used as part of the NetApp Cloud Backup service?

a) in-memory
b) file storage
c) object storage
d) block storage

**Answer: c**

## Question: 9

You must configure data replication between a NetApp Cloud Volumes ONTAP system in AWS and a In this scenario, what is a cost-effective way to accomplish this goal?

a) You must allow NetApp Cloud Manager to configure the network communication between the working environments during the cluster peering setup wizard.
b) You must configure ExpressRoute and Direct Connect with your on-premises data center.
c) You must configure a VPN connection between the AWS VPC and the Azure VNet.
d) Set up an Internet gateway on the AWS VPC that is hosting the Cloud Volumes ONTAP instance.

**Answer: a**

## Question: 10

One volume on your NetApp Cloud Volumes ONTAP HIgh-Availablllty (HA) cluster has reached a capacity limit. Which two actions would address this issue?

(Choose two.)

a) Move volumes to another Cloud Volumes ONTAP system.
b) Create another storage virtual machine (SVM) on your Cloud Volumes ONTAP node.
c) Migrate aggregates to the standby node in your Cloud Volumes ONTAP cluster.
d) Move volumes to another aggregate on the same system.

**Answer: c, d**

# Study Guide to Crack NetApp NCHC Architect NS0-603 Exam:

- Getting details of the NS0-603 syllabus, is the first step of a study plan. This pdf is going to be of ultimate help. Completion of the syllabus is must to pass the NS0-603 exam.
- Making a schedule is vital. A structured method of preparation leads to success. A candidate must plan his schedule and follow it rigorously to attain success.
- Joining the NetApp provided training for NS0-603 exam could be of much help. If there is specific training for the exam, you can discover it from the link above.
- Read from the NS0-603 sample questions to gain your idea about the actual exam questions. In this PDF useful sample questions are provided to make your exam preparation easy.
- Practicing on NS0-603 practice tests is must. Continuous practice will make you an expert in all syllabus areas.

## Reliable Online Practice Test for NS0-603 Certification

Make NWExam.com your best friend during your Hybrid Cloud Architect exam preparation. We provide authentic practice tests for the NS0-603 exam. Experts design these online practice tests, so we can offer you an exclusive experience of taking the actual NS0-603 exam. We guarantee you 100% success in your first exam attempt if you continue practicing regularly. Don't bother if you don't get 100% marks in initial practice exam attempts. Just utilize the result section to know your strengths and weaknesses and prepare according to that until you get 100% with our practice tests. Our evaluation makes you confident, and you can score high in the NS0-603 exam.
