Discover More about the HPE HPE6-A70 Certification

Are you interested in passing the HPE HPE6-A70 exam? First discover, who benefits from the HPE6-A70 certification. The HPE6-A70 is suitable for a candidate if he wants to learn about Networking. Passing the HPE6-A70 exam earns you the Aruba Certified Mobility Associate (ACMA) title.

While preparing for the HPE6-A70 exam, many candidates struggle to get the necessary materials. But do not worry; your struggling days are over. The HPE6-A70 PDF contains some of the most valuable preparation tips and the details and instant access to useful [HPE6-A70 study materials just at one click](#).

HPE HPE6-A70 Aruba ACMA Certification Details:

Exam Name	Aruba Certified Mobility Associate (ACMA)
Exam Code	HPE6-A70
Exam Price	\$145 (USD)
Duration	90 mins
Number of Questions	60
Passing Score	70%
Books / Training	Aruba Mobility Fundamentals, Rev. 20.11 Aruba Certified Mobility Associate Study Guide
Schedule Exam	Pearson VUE
Sample Questions	HPE Aruba ACMA Sample Questions
Practice Exam	Hewlett Packard Enterprise HPE6-A70 Certification Practice Exam

HPE HPE6-A70 Syllabus:

Topic	Details	Weights
Describe and differentiate WLAN fundamentals and Aruba Architectures	<ul style="list-style-type: none"> - Define elements, describe the functionality, and differentiate between the 802.11 standards and amendments, RF bands, channels, and regulatory domains. - Identify licenses that are used for various features, describe licensing 	30%

Topic	Details	Weights
	<p>pools, and differentiate between boxed-based, controller-based, and centralized licensing.</p> <ul style="list-style-type: none"> - Describe and differentiate between AP Modes (CAP, SA, AM, mesh point, mesh portal, IAP, RAP). 	
Identify and differentiate the functions, features, and capabilities of Aruba single-site on-premise enterprise solutions.	<ul style="list-style-type: none"> - Identify and differentiate automatic RF management capabilities and features. - Identify and differentiate the basic firewall policies and roles, and relate the roles to the policies and how they are applied in the hierarchy. - Identify and differentiate wireless security authentication types, server types, and encryption types. - Differentiate the scalability limits in the Aruba controller models, and given a scenario with customer requirements determine which model is appropriate. 	29%
Configure, validate, and troubleshoot Aruba WLAN secure employee and guest solutions.	<ul style="list-style-type: none"> - Select the appropriate components to configure a guest WLAN and validate the configuration. - Troubleshoot an employee and a guest WLAN. - Configure a guest WLAN and validate the configuration. 	27%
Manage and monitor Aruba solutions.	<ul style="list-style-type: none"> - Use the Mobility Master dashboards to monitor and troubleshoot client connectivity. - Describe the functionality and uses of AirWave. 	14%

Sample Questions:

Question: 1

What is one best practice for using channel bonding?

- a) Use channel bonding in the 5GHz band but not the 2.4GHz band
- b) Use 160MHz channel bonding on all APs that support this feature.
- c) Avoid the use of channel bonding with Multi-User MIMO (MU-MIMO).
- d) Avoid the use of channel bonding on the UNIE-1 channels.

Answer: a

Question: 2

In which circumstance does a company require a Remote AP?

- a) To connect to wireless clients in an outdoor location
- b) To support wireless services at a branch office and connect to a central controller
- c) To provide wireless and cloud-based security services at a branch office
- d) To connect two buildings over a wireless bridge

Answer: b

Question: 3

What is an enhancement to ClientMatch in an 8.x Aruba Master Mobility (MM)-based solution, as compared to the feature in 6.x code?

- a) More efficient client steering that is offloaded entirely to local APs
- b) Client steering regulated by a central MM
- c) Different rules deployed by a central MM to different AP models
- d) RF optimization regulated by Virtual Mobility Controllers (VMCs)

Answer: b

Question: 4

Which task can an Aruba Spectrum Monitor (SM) perform?

- a) Prevent client connections to rogue APs.
- b) Analyze wireless traffic patterns at the application level
- c) Optimize RF through the AP channel and transmit power plans.
- d) Analyze RF signals to determine the cause of non-802.11 interference.

Answer: d

Question: 5

Refer to the exhibit.

The screenshot shows a configuration interface for an AAA Profile. It includes several dropdown menus and a checkbox:

- AAA Profile: Exam_Employees
- Initial role: logon
- MAC Authentication Default Role: guest
- 802.1X Authentication Default Role: users1
- Download Role from CPPM:

The network administrator changes the “802.1X Authentication Default Role” setting. To which users will the new role apply?

- a) Users who have successfully authenticated with 802.1X, regardless of any attributes sent by the authentication server.
- b) Users who have successfully authenticated with 802.1X and are not assigned to a different role by the authentication server.
- c) Users who are currently in the process of 802.1X authentication, regardless of MAC authentication status.
- d) Users who have succeeded MAC authentication and are currently undergoing 802.1X authentication.

Answer: b

Question: 6

What is one role of a Virtual Mobility Controller (VMC) in an Aruba Mobility Master (MM)-based architecture?

- a) It validates configurations before those configurations are deployed to hardware MCs.
- b) It manages WLAN settings for multiple hardware MCs from a central location.
- c) It terminates connections for APs and handles AP and wireless client traffic.
- d) It determines the best channel and transmit power for the APs that it manages.

Answer: c

Question: 7

How are authentication and encryption connected in a WLAN that uses WPA2-Enterprise?

- a) A wireless user authenticates to an authentication server, and encryption keys are distributed as part of this process.
- b) A wireless user submits a preshared key that functions as a password, and this key is also used to derive encryption keys.
- c) The mobility controller automatically creates an IPsec tunnel to each user who successfully authenticates to an authentication server.
- d) The mobility controller checks the wireless client MAC address. If the MAC address is authorized, the controller distributes encryption keys to the client.

Answer: a

Question: 8

A company wants two Aruba Mobility Controllers to provide redundant services for a new site. The controllers must support access for employees and guests, including a local captive portal.

They must support 800 Aruba 330 APs and 20,000 users. In a failover situation, a single controller must be able to support all of the APs and users.

Which Aruba Mobility Controller models meet the customer requirements and do not unnecessarily exceed them?

- a) Aruba 7010 controllers
- b) Aruba 7030 controllers
- c) Aruba 7210 controllers
- d) Aruba 7220 controllers

Answer: d

Question: 9

An AP operates on channel 6. Which device causes the most significant and consistent interference with the signal?

- a) wireless security camera operating on channel 8
- b) AP operating on channel 11
- c) cellular phone
- d) weather radar

Answer: a

Question: 10

How does a high-gain omni-directional antenna compare to a typical omni-directional antenna?

- a) it provides more multi-user spatial streams
- b) it provides more single-user spatial streams
- c) it provides more coverage in the horizontal direction than in the vertical direction
- d) it provides more coverage in both the horizontal and vertical directions.

Answer: c

Avail the Study Guide to Pass HPE HPE6-A70 Aruba ACMA Exam:

- Find out about the HPE6-A70 syllabus topics. Visiting the official site offers an idea about the exam structure and other important study resources. Going through the syllabus topics help to plan the exam in an organized manner.
- Once you are done exploring the [HPE HPE6-A70 syllabus](#), it is time to plan for studying and covering the syllabus topics from the core. Chalk out the best plan for yourself to cover each part of the syllabus in a hassle-free manner.
- A study schedule helps you to stay calm throughout your exam preparation. It should contain your materials and thoughts like study hours, number of topics for daily studying mentioned on it. The best bet to clear the exam is to follow your schedule rigorously.
- The candidate should not miss out on the scope to learn from the [Aruba ACMA training](#). Joining the HPE provided training for this HPE certification exam helps a candidate to strengthen his practical knowledge base from the certification.
- Learning about the probable questions and gaining knowledge regarding the exam structure helps a lot. Go through the [HPE HPE6-A70 sample questions](#) and boost your knowledge
- Make yourself a pro through online practicing the syllabus topics. HPE6-A70 practice tests would guide you on your strengths and weaknesses regarding the syllabus topics. Through rigorous practicing, you can improve the weaker sections too. Learn well about time management during exam and become confident gradually with practice tests.

Career Benefits:

Passing the HPE HPE6-A70 exam, helps a candidate to prosper highly in his career. Having the certification on the resume adds to the candidate's benefit and helps to get the best opportunities.

Here Is the Trusted Practice Test for the HPE HPE6-A70 Certification

CertFun.Com is here with all the necessary details regarding the HPE6-A70 exam. We provide authentic practice tests for the HPE6-A70 exam. What do you gain from these practice tests? You get to experience the real exam-like questions made by industry experts and get a scope to improve your performance in the actual exam. Rely on CertFun.Com for rigorous, unlimited two-month attempts on the [HPE6-A70 practice tests](#), and gradually build your confidence. Rigorous practice made many aspirants successful and made their journey easy towards grabbing the Aruba Certified Mobility Associate (ACMA).
