Check Point 156-560 Sample Questions:

Question: 1

The best practice for CloudGuard Network deployments utilizes the Hub and Spoke model. Which of these statements is the most correct for this model?

- a) All the security components including SMS, Northbound and Southbound Security Gateways and East-West VPN Gateways will all be deployed in one Hub
- b) A Spoke can ONLY consist of a single virtual machine in a dedicated subnet shared between the VM and the Hub
- c) The Hub and Spoke model is applicable ONLY to multi-cloud environments. The Hub includes all the Security Gateways in all cloud environments. Each Spoke includes all resources of a Data-Center in a single Cloud Environment
- d) All traffic that enters and exits each spoke must travel through a hub

Answer: d

Question: 2

How does micro-segmentation create boundaries and provide network segmentation for CloudGuard?

- a) Micro-segmentation does not create boundaries.
- b) It creates borders within the cloud's perimeter to protect the major inbound and outbound traffic intersections.
- c) It applies a Security Gateway that enforces firewall policies to accept legitimate network traffic flows and deny unauthorized traffic
- d) It places inspection points between different applications, services, and single hosts within the same network segment.

Answer: b

Question: 3

What does the Adaptive Security Policy involve to import the Data Center Objects?

- a) CloudGuard API
- b) CloudGuard Controller
- c) CloudGuard Access Control
- d) CloudGuard Gateway

Answer: b

Question: 4

According to best practices what would be the best way to install a Check Point cluster on AWS?

- a) Following the instruction from the relevant Check Point SK
- b) With PowerShell
- c) From AWS Console
- d) From AWS Market Place

Answer: a

Question: 5

How is CloudGuard for Azure licensed in BYOL (Bring your own license) mode?

- a) Per usage
- b) Per Socket
- c) Per vCore
- d) Per Gateway

Answer: c

Question: 6

On Azure, can you deploy a Check Point Standalone installation (Management + GW)?

- a) No, it is not supported
- b) Yes, via GitHub only
- c) Yes, via PowerShell only
- d) Yes, via solution template / PowerShell / Marketplace

Answer: d

Question: 7

In a CloudGuard deployment, what does the acronym IAM stand for?

- a) Information and Adaptability Measures
- b) IP Address Management
- c) Identity and Access Management
- d) Instant Access Management

Answer: c

Question: 8

Why is an IAM role created when installing a cluster on AWS?

- a) In order to perform cluster related changes
- b) It is created for the installation process only, it gets deleted
- c) IAM role is created for auditing purposes
- d) IAM role is not created

Answer: c

Question: 9

What are the Automation tools?

- a) API, CLI, Scripts, Shells and Templates
- b) Terraform and Ansible
- c) AMLs
- d) CloudFormation

Answer: a

Question: 10

Where are the api logs found on the Security Management Server?

- a) \$FWDIR/log/api.elg
- b) /var/tmp/api.elg
- c) /var/log/api.elg
- d) /opt/log/api.elg

Answer: a

Study Guide to Crack Check Point CCCS 156-560 Exam:

- Getting details of the 156-560 syllabus, is the first step of a study plan. This pdf is going to be of ultimate help. Completion of the syllabus is must to pass the 156-560 exam.
- Making a schedule is vital. A structured method of preparation leads to success. A candidate must plan his schedule and follow it rigorously to attain success.
- Joining the Check Point provided training for 156-560 exam could be of much help. If there is specific training for the exam, you can discover it from the link above.
