Know Your 1Z0-1071-23 Certification Well:

The 1Z0-1071-23 is best suitable for candidates who want to gain knowledge in the Oracle Application Development. Before you start your 1Z0-1071-23 preparation you may struggle to get all the crucial Cloud Infrastructure Digital Assistant Professional materials like 1Z0-1071-23 syllabus, sample questions, study guide.

But don't worry the 1Z0-1071-23 PDF is here to help you prepare in a stress free manner.

The PDF is a combination of all your queries like-
- What is in the 1Z0-1071-23 syllabus?
- How many questions are there in the 1Z0-1071-23 exam?
- Which Practice test would help me to pass the 1Z0-1071-23 exam at the first attempt?

Passing the 1Z0-1071-23 exam makes you Oracle Cloud Infrastructure 2023 Certified Digital Assistant Professional. Having the Cloud Infrastructure Digital Assistant Professional certification opens multiple opportunities for you. You can grab a new job, get a higher salary or simply get recognition within your current organization.

Oracle 1Z0-1071-23 Cloud Infrastructure Digital Assistant Professional Certification Details:

Exam Name	Oracle Cloud Infrastructure 2023 Digital Assistant Professional
Exam Code	1Z0-1071-23
Exam Price	USD $245 (Pricing may vary by country or by localized currency)
Duration	90 minutes
Number of Questions	55
Passing Score	65%
Format	Multiple Choice Questions (MCQ)
Recommended Training	**Become a Digital Assistant Developer (2023)**

Schedule Exam	**Buy Oracle Training and Certification**
Sample Questions	**Oracle Cloud Infrastructure 2023 Certified Digital Assistant Professional**
Recommended Practice	**1Z0-1071-23 Online Practice Exam**

1Z0-1071-23 Syllabus:

Intro to Conversational AI and Oracle Digital Assistant	- What is Conversational AI? - Linguistic Model Concepts - What is Oracle Digital Assistant - Introduction to Skills - Introduction to Digital Assistants - Introduction to Channels	10%
Conversation Design	- The benefits of a conversational digital assistant - What makes a great conversation - The conversational project timeline - The human skills you need for a conversational project - The fundamentals of conversation design	25%
Design and Build Intents, Create and Build Entities	- NLP and designing intents - Utterance creation and testing - Extracting information from entities - Entity event handlers - Machine learning entities	25%
Dialog Flows, Custom Components, and Backend Services	- Introduction to dialog flows - Dialog flow components - Dialog flow design considerations - Answer intents in dialog flows - Building action menus - Custom components - How to call backend services	20%
Digital Assistants, Channels, Resource Bundles, and Multilingual Digital Assistants	- Digital Assistant Basics - Routing in Digital Assistants - Channel Basics - Web Channels - Webhook Channels - Multilingual Digital Assistants - Build an Intelligent FAQ Digital Assistant	20%

Oracle 1Z0-1071-23 Sample Questions:

Question: 1

A user is in the middle of a conversation flow with a digital assistant but then triggers the Exit system intent by saying "get me out of here". Which statement is true?

a) Because the user didn't explicitly specify the invocation name of the skill when exiting, the user will always be prompted to confirm exiting the current conversation.
b) The conversation can only be exited if the current context score is lower than the Exit Skill Confirmation digital assistant routing parameter.
c) The conversation can only be exited if the current context score is greater than the Exit Skill Confirmation digital assistant routing parameter.
d) The conversation will resume at a state in theskill defined by a digital assistant parameter.
e) Depending on digital assistant routing parameters, the user will be prompted to confirm exiting from the current conversation.

Answer: c

Question: 2

You want your skill to transfer conversations over to Oracle Service Cloud customer service representatives. Which type of channel do you create to enable the skill to do this?

a) Agent Integrations
b) System
c) Applications
d) Users

Answer: a

Question: 3

Which two components can be used in combination with composite bag entities to auto-generate skill responses and flows from definitions saved in bag items?

a) System.ResolveEntities
b) System.Text
c) System.MatchEntity
d) System.CommonResponse
e) System.List

Answer: a, d

Question: 4

Error handlers can be defined in various locations with different scopes. Which three statements are true about error handling?

a) An error handler can be defined as a transition on any dialog flow state in a skill.
b) The system error handler is called in case of an error when no error handling is defined on the current dialog flow state or as a default transition.
c) You can define a system-wide custom error handler at the digital assistant level.
d) Implicit error handling is always performed even if there are other error handlers defined in the flow.
e) An error handler can be defined globally for a skill using the defaultTransition error transition.

Answer: b, c, d

Question: 5

Select the FALSE statement regarding confidence levels when routing within a digital assistant.

a) Confidence level is the intent engine's score for utterance classification.
b) If other intents that exceed the confidence threshold have scores that are within that of the top intent by less than the win margin, these intents are also presented to the user.
c) All skills within a digital assistant must have the same confidence threshold.
d) A confidence threshold is a value that's compared to the confidence level by the system, intent component to define the next action.

Answer: d

Question: 6

Which three statements are FALSE regarding entity resolution using a composite bag?

a) The composite bag will automatically resolve any entity values found in the initial user input.
b) Each entity item in the composite bag can have only one value.
c) When a user inputs entity values, they can only be resolved in the order in which they are defined within the composite bag.
d) Every entity item in the composite bag must be prompted for and have a value entered.
e) You can define validation code using Apache Freemarker for entity item values.
f) You can define multiple prompts for each entity item inthe composite bag.

Answer: c, d, f

Question: 7

How do you declare a context variable for an entity?

a) Set the variable type to "nlpresult".
b) Set the variable type to the same name as the entity.
c) Set the variable type to "entity".
d) Set the variable type to"map" and reference the value by the entity name.

Answer: c

Question: 8

You have a use case that calls for users to enter a series of complex values. What would you do to ensure that users enter these values correctly with the least effort?

a) Create a dedicated skil for collecting and validating input and pairit with a skill for processing the validated input.
b) Create a composite bagentity for the types of values, and then add a regexentity to handle validation.
c) Use a system.common Response component to aggregate and validate user input.
d) Create a web view service which connects the skill to a web app that renders as a form and provides features such as input validation and option buttons.

Answer: b

Question: 9

As per Oracle's recommendation, which is the best practice regarding conversational design?

a) Use quick reply buttons (as opposed to natural language inputs) as much as possible.
b) Ask users open-endedquestions such as "how can I help you?"
c) Ensure that capabilities of the bot f the things that it can and can't do") are clear and discoverable.
d) To account for possible mistakes, make it clear to users that the bot is still learning.

Answer: b

Question: 10

Which two statements about skills are true?

a) Skills can access back-end services.
b) Skills always use natural languages processing (NLP).
c) Skills have dialog flows that you may configure to create conversation.
d) Customers can only chat withskill when those skills managed by a digital assistant.

Answer: a, d

Study Guide to Crack Oracle Cloud Infrastructure Digital Assistant Professional 1Z0-1071-23 Exam:

- Getting details of the 1Z0-1071-23 syllabus, is the first step of a study plan. This pdf is going to be of ultimate help. Completion of the syllabus is must to pass the 1Z0-1071-23 exam.
- Making a schedule is vital. A structured method of preparation leads to success. A candidate must plan his schedule and follow it rigorously to attain success.
- Joining the Oracle provided training for 1Z0-1071-23 exam could be of much help. If there is specific training for the exam, you can discover it from the link above.
- Read from the 1Z0-1071-23 sample questions to gain your idea about the actual exam questions. In this PDF useful sample questions are provided to make your exam preparation easy.
- Practicing on 1Z0-1071-23 practice tests is must. Continuous practice will make you an expert in all syllabus areas.

Reliable Online Practice Test for 1Z0-1071-23 Certification

Make DBExam.com your best friend during your Oracle Cloud Infrastructure 2023 Digital Assistant Professional exam preparation. We provide authentic practice tests for the 1Z0-1071-23 exam. Experts design these online practice tests, so we can offer you an exclusive experience of taking the actual 1Z0-1071-23 exam. We guarantee you 100% success in your first exam attempt if you continue practicing regularly. Don't bother if you don't get 100% marks in initial practice exam attempts. Just utilize the result section to know your strengths and weaknesses and prepare according to that until you get 100% with our practice tests. Our evaluation makes you confident, and you can score high in the 1Z0-1071-23 exam.
