Exam Price	\$200 (USD)
Duration	90 mins
Number of Questions	61
Passing Score	75%
Books / Training	<a href="#">Operational Decision Manager Version 8.9.1 documentation</a>
Schedule Exam	<a href="#">Pearson VUE</a>
Sample Questions	<a href="#">IBM Operational Decision Manager Standard</a>

	<a href="#"><u>Application Development Sample Questions</u></a>
Practice Exam	<a href="#"><u>IBM C1000-010 Certification Practice Exam</u></a>

## C1000-010 Syllabus:

Topic	Details	Weights
Decision Center	<ul style="list-style-type: none"> <li>- Define Roles and Responsibilities</li> <li>- Secure Decision Center</li> <li>- Define decision governance framework</li> <li>- Set up Deployment from Decision Center</li> <li>- Enable and customize testing and simulations for business users</li> <li>- Understand branching and merging</li> </ul>	16%
Development: Architecture	<ul style="list-style-type: none"> <li>- Analyze business requirements</li> <li>- Plan the Architecture</li> <li>- Identify decisions, decision points, and business policies</li> </ul>	16%
Development: Environment Set-up	<ul style="list-style-type: none"> <li>- Install</li> <li>- Migrate</li> </ul>	9%
Rule Designer	<ul style="list-style-type: none"> <li>- Create Decision Service projects</li> <li>- Import the XOM</li> <li>- Create BOM and vocabulary</li> <li>- Add Decision Operations</li> <li>- Deploy RuleApp</li> <li>- Create Client Application</li> <li>- Create Ruleflow</li> <li>- Author rules and decision tables</li> <li>- Manage BOM update</li> <li>- Manage synchronization</li> <li>- Define and run queries</li> </ul>	39%
Rule Execution Server	<ul style="list-style-type: none"> <li>- Work with the RES REST API</li> <li>- Manage RuleApp and Ruleset Versioning policy</li> <li>- Integration</li> <li>- Use Decision Warehouse</li> <li>- Optimize Execution</li> </ul>	20%

## IBM C1000-010 Sample Questions:

### Question: 1

To configure Decision Center on the application server, one of the steps is to define the Java EE security roles for the Decision Center before the deployment of the Decision Center archive. What does Decision Center use these security roles for?

- a) To perform the permission management after project security is enabled
- b) To control the rule artifacts access rights for the secured rule project
- c) To secure the administration tasks on the Decision Center Business Console
- d) To determine what features an authenticated user can access after logging in

**Answer: d**

### Question: 2

Which statement is true regarding Java XOM deployment?

- a) The XOM can be deployed after ruleapp.xommanaged property has been defined.
- b) The XOM can only be deployed from Decision Center.
- c) The Java XOM must be deployed to Rule Execution Server instances before the first synchronization to decision center.
- d) Once managed XOM is enabled, any subsequent XOM changes are automatically handled in Decision Center and don't require a manual deployment from Rule Designer.

**Answer: c**

### Question: 3

Categories named Vehicle and Customer have been added to a rule project. In the BOM of this project, a business element Car has been assigned categories Vehicle and Automobile and a business element Client has been assigned the category Customer.

Which category filters need to be assigned to an action rule so that both the Car and Client business element are visible in the rule?

(Select two.)

- a) Vehicle and Automobile
- b) Any
- c) Vehicle and Client
- d) Client

**Answer: a, d**

**Question: 4**

Bea, a rule author is assigned a change activity with several updates on the Spring release of a project. Bea finishes the change activity and marks it Ready for Approval. The project Owner, Paul, approves the changes.

However, as soon as Paul marks the release Complete, he immediately realizes the updates are wrong. What must Paul do to revert the updates?

- a) Paul cancels the approval by changing the status of the release to: Rejected
- b) Paul deletes the release, creates another release, and creates a change activity with the corrected updates.
- c) Paul cancels the release, changes the status from Canceled to Reopen release, and creates a change activity to revert the updates.
- d) The Decision Center Administrator forces the release state from Complete back to In Progress and sets the change activity status to Resume Working

**Answer: b**

**Question: 5**

A rule project has a BOM created from a dynamic execution object model by importing an XML schema. After the XOM was imported several changes were made to names of types in the referenced XML schema resulting in errors in the rule project.

What action must taken to fix these errors?

- a) Update the BOM using the BOM update function.
- b) Run validation against the decision service rule project.
- c) Re-import the updated dynamic and refresh the rule project.
- d) Update the BOM to XOM mapping for each affected member in the BOM class.

**Answer: a**

**Question: 6**

Which artifact is a supported execution object model (XOM) source?

- a) C# classes
- b) .JS classes
- c) Java classes
- d) TypeScript classes

**Answer: c**

**Question: 7**

A developer had a task of implementing a decision service for a loan processing application. They created a XOM project that contains a class named "Application", and based on that, created a BOM project. Then they created a rule project referencing this BOM project.

In this rule project, they defined a single parameter "application" for the ruleset that can be accessed by the client application. Based on the scenario above, which statement is true?

- a) The parameter "application" has to be initialized before it is used in the ruleflow.
- b) The "application" can only be an input parameter.
- c) The developer will have a warning in the project saying that "at least need 2 parameters for a ruleset".
- d) The "application" has to be an input-output parameter.

**Answer: d**

**Question: 8**

Which statements applies when enforcing security on a project in Decision Center Business console?

- a) Decision Center Business console must be used to grant fine-grained permissions.
- b) Decision Center Enterprise console must be used to grant finegrained permissions.
- c) No members of any Decision Center group can see the project unless permissions are explicitly specified.
- d) No members of custom groups can see the project unless they are added to the default Decision Center groups.

**Answer: b**

**Question: 9**

Which statement regarding decision services is true?

- a) Once a main rule project is defined, it cannot be changed to a standard rule project.
- b) The main rule project must be defined as either a decision service entry point or a referenced rule project.
- c) A main rule project can be referenced in other decision services as a sub-project.
- d) The main rule project is the top-level project and entry point to the decision service.

**Answer: d**

**Question: 10**

In IBM Decision Center, which role is responsible for creating and managing snapshots of decision projects?

- a) Business Analyst
- b) Decision Governance Manager
- c) Rule Designer
- d) System Administrator

**Answer: b**

## Study Guide to Crack IBM Operational Decision Manager Standard Application Development C1000-010 Exam:

- Getting details of the C1000-010 syllabus, is the first step of a study plan. This pdf is going to be of ultimate help. Completion of the syllabus is must to pass the C1000-010 exam.
- Making a schedule is vital. A structured method of preparation leads to success. A candidate must plan his schedule and follow it rigorously to attain success.
- Joining the IBM provided training for C1000-010 exam could be of much help. If there is specific training for the exam, you can discover it from the link above.
- Read from the C1000-010 sample questions to gain your idea about the actual exam questions. In this PDF useful sample questions are provided to make your exam preparation easy.
- Practicing on C1000-010 practice tests is must. Continuous practice will make you an expert in all syllabus areas.

## Reliable Online Practice Test for C1000-010 Certification

Make EduSum.com your best friend during your IBM Operational Decision Manager Standard V8.9.1 Application Development exam preparation. We provide authentic practice tests for the C1000-010 exam. Experts design these online practice tests, so we can offer you an exclusive experience of taking the actual C1000-010 exam. We guarantee you 100% success in your first exam attempt if you continue practicing regularly. Don't bother if you don't get 100% marks in initial practice exam attempts. Just utilize the result section to know your strengths and weaknesses and prepare according to that until you get 100% with our practice tests. Our evaluation makes you confident, and you can score high in the C1000-010 exam.
