## Broaden Your Knowledge with Broadcom 250-578 Sample Questions:

### Question: 1

You have AppNeta Native Monitoring Points deployed on end user workstations running macOS. What is the result if an end-user quits the menu bar app?

- a) The Monitoring Point is uninstalled, and all monitoring data is deleted
- b) All monitoring from the workstation is disabled until the app is restarted
- c) Automatic software updates are disabled until the app is restarted
- d) All monitoring and automatic software updates are disabled until the app is restarted

**Answer: c**

### Question: 2

What is the first step to obtain an AppNeta On-Prem upgrade?

- a) Enable the remote maintenance tunnel in the AppNeta On-Prem portal
- b) Click the Upgrade Now button in the AppNeta On-Prem portal
- c) Download the latest release from the Broadcom Support portal
- d) Broadcom Support will coordinate a maintenance window

**Answer: d**

### Question: 3

In the Location Bandwidth Quality Report, when configuring an Office for a location with an asymmetric link, which would make a better reference path?

- a) Single-ended network path
- b) Dual-ended network path
- c) Browser web path
- d) HTTP web path

**Answer: b**

**Question: 4**

Your company has adopted a hybrid work environment where employees have the flexibility to work from an office or from home. When an employee reports a performance issue, you want to be able to quickly pinpoint (or rule out) the health of their internet connection, regardless of where they work from on a given day.

What is the best approach in AppNeta for your use case?

- a) Network paths from Native Monitoring Points on user workstations to a Global Monitoring Target
- b) Network paths from Global Monitoring Points to a Global Monitoring Target
- c) Web paths from Native Monitoring Points on user workstations test HTTP connectivity to a web application
- d) Web paths from Global Monitoring Points load a web application in a browser

**Answer: a**

**Question: 5**

Four network paths are aggregated into one line on a Current Network Violation Map. What color is the line if the current path statuses are: OK (green), Disabled (grey), Violated (red), OK (green)

- a) Black
- b) Red
- c) Green
- d) Grey

**Answer: b**

**Question: 6**

You are creating dual-ended network paths in Delivery to monitor a QoS queue. You have already created a custom alert profile that will violate when QoS is altered by the network. When customizing the network path settings, you notice your custom alert profile is missing from the picklist.

Why isn't the alert profile in the list?

- a) A QoS template was not selected in the path settings
- b) The connectivity test was skipped when specifying the path targets
- c) No QoS queue was detected during the connectivity test
- d) QoS templates are not supported for dual-ended paths

**Answer: a**

**Question: 7**

In the Experience component, you are setting up a Web App Group with a browser workflow to simulate a user logging into, then out of a web app. Occasionally a pop-up must be dismissed in the app between the login and logout actions.

Which command do you use to dismiss the pop-up when it appears?

- a) click
- b) clickAndWait
- c) assertAlertPresent
- d) clickIfVisible

**Answer: d**

**Question: 8**

You want to centrally manage user access to your AppNeta SaaS organization and decide to set up SAML-based SSO. Which of the following steps is Broadcom's responsibility?

- a) Generate the AppNeta SAML metadata file
- b) Decide which AppNeta organizations should use SSO
- c) Choose a keyword for the custom sign-on URL
- d) Generate the Identity Provider's SAML metadata file

**Answer: a**

**Question: 9**

Which AppNeta alerts can be temporarily muted while continuing to monitor performance?

- a) Delivery alerts(network paths)
- b) Experience alerts (web paths)
- c) Usage alerts(traffic analysis)
- d) Delivery and Experience alerts

**Answer: b**

**Question: 10**

Which Monitoring Point models support VLAN tagged interfaces?

- a) Hardware Monitoring Points only
- b) Container-based Monitoring Points only
- c) Hardware, Container-based, and Virtual Monitoring Points
- d) Hardware, Virtual, and Global Monitoring Points

**Answer: c**
