Know Your 5V0-93.22 Certification Well:

The 5V0-93.22 is best suitable for candidates who want to gain knowledge in the VMware Security. Before you start your 5V0-93.22 preparation you may struggle to get all the crucial Carbon Black Cloud Endpoint Standard Skills materials like 5V0-93.22 syllabus, sample questions, study guide.

But don't worry the 5V0-93.22 PDF is here to help you prepare in a stress free manner.

The PDF is a combination of all your queries like-

- What is in the 5V0-93.22 syllabus?
- How many questions are there in the 5V0-93.22 exam?
- Which Practice test would help me to pass the 5V0-93.22 exam at the first attempt?

Passing the 5V0-93.22 exam makes you VMware Carbon Black Cloud Endpoint Standard Skills 2023. Having the Carbon Black Cloud Endpoint Standard Skills certification opens multiple opportunities for you. You can grab a new job, get a higher salary or simply get recognition within your current organization.

VMware 5V0-93.22 Carbon Black Cloud Endpoint Standard Skills Certification Details:

Exam Name	VMware Carbon Black Cloud Endpoint Standard Skills
Exam Code	5V0-93.22
Exam Price	\$250 USD
Duration	105 minutes
Number of Questions	60
Passing Score	300 / 500
Recommended Training / Books	VMware Carbon Black Cloud Endpoint Standard VMware Carbon Black Cloud Endpoint Standard - On Demand
Schedule Exam	PEARSON VUE
Sample Questions	VMware 5V0-93.22 Sample Questions
Recommended Practice	VMware Carbon Black Cloud Endpoint Standard Skills 2023 Practice Test

5V0-93.22 Syllabus:

Section	Objectives
Architectures and Technologies	<ul style="list-style-type: none"> - Identify the architecture and data flows for Carbon Black Cloud endpoint Standard communication. - Identify the functionality of sensor vs. cloud.
VMware Products and Solutions	<ul style="list-style-type: none"> - Identify the response capabilities available in the VMware Carbon Black Cloud. - Identify the commands available within the Live Response features in the VMware Carbon Black Cloud. - Identify the purpose of Reputation Priority. - Identify the notification capabilities within the VMware Carbon Black Cloud. - Identify the native integrations available within the VMware Carbon Black Cloud.
Planning and Designing	<ul style="list-style-type: none"> - Identify security benefits of using VMware Carbon Black Endpoint Standard. - Identify use cases of VMware Carbon Black Endpoint Standard. - Given organizational requirements, identify how to implement the Carbon Black Cloud Endpoint Standard policies to meet the requirements. - Identify the impact of Reputation Priority on applications.
Installing, Configuring, and Setup	<ul style="list-style-type: none"> - Given organizational requirements, identify how to implement the Carbon Black Cloud Endpoint Standard rules to prevent and mitigate attacks. - Given a set of rules, identify intended impacts on the endpoints. - Given a set of rules, identify how to determine unintended impacts on the endpoints. - Given a permission rule allowing execution, identify possible security risks. - Given a blocking rule preventing execution, identify possible security risks. - Given a scenario, identify the proper configuration of the local scanner. - Given security requirements, identify the correct sensor policy configuration.
Performance-tuning, Optimization, Upgrades	
Troubleshooting and Repairing	
Administrative and Operational Tasks	<ul style="list-style-type: none"> - Given a scenario about a suspicious behavior, identify how to perform a search across endpoint data. - Given a scenario, identify how to respond to an alert. - Given a scenario, identify the impact of a generated alert. - Given a scenario, identify types of relevant information in an event. - Given a security incident scenario, identify the first response that should be used within the VMware Carbon Black Cloud. - Given a search, identify correct use of operators.

Section	Objectives
	- Identify the functionality of Advanced Queries. - Given a scenario, identify the proper Reputation override option. - Identify where sensor status and sensor details exist. - Given the scenario including the status of a sensor, identify the correct action for a sensor.

VMware 5V0-93.22 Sample Questions:

Question: 1

What connectivity is required for VMware Carbon Black Cloud Endpoint Standard to perform Sensor Certificate Validation?

- TCP/443 to GoDaddy OCSP and CRL URLs (crl.godaddy.com and obsp.godaddy.com)
- TCP/80 to GoDaddy OCSP and CRL URLs (crl.godaddy.com and obsp.godaddy.com)
- TCP/443 to GoDaddy CRL URL (crl.godaddy.com and obsp.godaddy.com)
- TCP/80 to GoDaddy CRL URL (crl.godaddy.com and obsp.godaddy.com)

Answer: a

Question: 2

Is it possible to search for unsigned files in the console?

- Yes, by using the search: NOT process_publisher_state:FILE_SIGNATURE_STATE_SIGNED
- No, it is not possible to return a query for unsigned files.
- Yes, by using the search: process_publisher_state:FILE_SIGNATURE_STATE_UNSIGNED
- Yes, by looking at signed and unsigned executables in the environment and seeing if another difference can be found, thus locating unsigned files in the environment.

Answer: c

Question: 3

What are the highest and lowest file reputation priorities, respectively, in VMware Carbon Black Cloud?

- Priority 1: Ignore, Priority 11: Unknown
- Priority 1: Unknown, Priority 11: Ignore
- Priority 1: Known Malware, Priority 11: Common White
- Priority 1: Company Allowed, Priority 11: Not Listed/Adaptive White

Answer: a

Question: 4

Which command is used to immediately terminate a current Live Response session?

- a) delete
- b) execfg
- c) detach -q
- d) kill

Answer: c

Question: 5
