Know Your NS0-304 Certification Well:

The NS0-304 is best suitable for candidates who want to gain knowledge in the NetApp Hybrid Cloud. Before you start your NS0-304 preparation you may struggle to get all the crucial NCHC Administrator materials like NS0-304 syllabus, sample questions, study guide.

But don't worry the NS0-304 PDF is here to help you prepare in a stress free manner.

The PDF is a combination of all [your queries like-](#)

- What is in the NS0-304 syllabus?
- How many questions are there in the NS0-304 exam?
- Which Practice test would help me to pass the NS0-304 exam at the first attempt?

Passing the NS0-304 exam makes you NetApp Certified Hybrid Cloud Administrator. Having the NCHC Administrator certification opens multiple opportunities for you. You can grab a new job, get a higher salary or simply get recognition within your current organization.

NetApp NS0-304 NCHC Administrator Certification Details:

Exam Name	Hybrid Cloud Administrator
Exam Number	NS0-304 NCHCAD
Exam Price	\$150 USD
Duration	90 minutes
Number of Questions	60
Passing Score	64
Recommended Training	NetApp Public Cloud Services Fundamentals Cloud Volumes ONTAP Fundamentals OnCommand Insight: Fundamentals StorageGRID Fundamentals
Exam Registration	PEARSON VUE
Sample Questions	NetApp NS0-304 Sample Questions
Practice Exam	NetApp Certified Hybrid Cloud Administrator Practice Test

NS0-304 Syllabus:

Section	Objectives
Hybrid Cloud Concepts	<ul style="list-style-type: none"> - Identify networking in Hybrid Cloud - Identify consumption models - Identify Hybrid Cloud environment
Configuration	<ul style="list-style-type: none"> - Provision resources - Determine placement of resources - Migrate data
Automate	<ul style="list-style-type: none"> - Automate common workflows - Use system templates
Secure and Protect	<ul style="list-style-type: none"> - Validate IAM policies - Configure access permissions - Identify compliance requirements - Setup security policies - Manage data protection solutions for Hybrid Cloud
Monitor and Troubleshoot	<ul style="list-style-type: none"> - Configure monitoring, alerting, and reporting - Troubleshoot Hybrid Cloud

NetApp NS0-304 Sample Questions:

Question: 1

You are an administrator of your NetApp Cloud Volumes ONTAP system in AWS. You want to tier backup data from the data protection volumes in your system to object storage to lower costs. You are aware that some of the requirements for data tiering are met automatically by NetApp Cloud Manager.

In this scenario, which two criteria must be satisfied before enabling tiering from NetApp Cloud Manager? (Choose two.)

- a) Ensure that you have tiering enabled on the aggregate in which your data protection volume exists.
- b) Ensure that you have internal connectivity using the VPC endpoint to the Amazon S3 service.
- c) Ensure that you have installed a tiering license before enabling data tiering from NetApp Cloud Manager.
- d) Ensure that you have created an Amazon S3 bucket before you enable tiering from NetApp Cloud Manager.

Answer: a, b

Question: 2

You have a 100 TB Cloud Volumes Service NFS volume called vol1. You are asked to create a second read/write test copy of the volume called vol1_test.

In this scenario, what is the fastest supported method to create vol1_test?

- a) Create vol1_test from a Snapshot copy.
- b) Use Cloud Sync to synchronize vol1 to vol1_test.
- c) Use SnapMirror to mirror vol1 to vol1_test.
- d) Use rsync to copy vol1 to vol1_test.

Answer: a

Question: 3

Your organization's security policy requires centrally managed user rights with granular permission assignment capabilities for authenticated users to access the Spot by NetApp console.

Which method accomplishes this task?

- a) Configure integration with your organization's single sign-on (SSO).
- b) Enable Spot by NetApp's multifactor authentication (MFA).
- c) Create an access token and assign it to each user.
- d) Create a programmatic user account for each user.

Answer: a

Question: 4

You are managing a large NetApp hybrid cloud estate across your business and are experiencing VM performance problems. You are asked to investigate. You need a tool that provides monitoring capabilities and enables you to solve specific issues quickly.

Which NetApp tool would you deploy to satisfy these requirements?

- a) NetApp Cloud Compliance
- b) Spot Eco by NetApp
- c) NetApp Cloud Insights
- d) NetApp Cloud Manager

Answer: c

Question: 5

You have a cloud-connected storage system that is located in a collocation facility that uses a direct connect into AWS. The direct connect circuit is already configured, and it is working for the SVMs that were created earlier on the cluster.

You are creating a new SVM on the storage cluster in your collocation. You want your compute nodes in AWS to be able to connect to the storage on the newly created SVM.

Which two steps must you perform to accomplish this task?

(Choose two.)

- a) Create VLAN interface ports on cluster nodes.
- b) Set up a network connection to the Internet in the collocation.
- c) You must have an AWS Elastic Network IP (EIP) attached to the compute nodes in AWS.
- d) Create the protocol LIFs on the SVM that uses the VLAN interface ports.

Answer: a, d

Question: 6

What are two requirements when using SaaS-based NetApp Cloud Manager to deploy an instance of Cloud Volumes ONTAP?

(Choose two.)

- a) A NetApp Connector in your cloud or an on-premises network is required.
- b) A service account needs to deploy it.
- c) An account administrator needs to deploy it.
- d) A storage gateway in your cloud or an on-premises network is required.

Answer: a, c

Question: 7

Which hypervisor would be deployed using NetApp Deployment Engine?

- a) Red Hat Virtualization
- b) VMware vSphere
- c) Citrix Xen
- d) KVM Correct

Answer: b

Question: 8

You are experiencing slow database queries from a compute instance running a relational database on Azure NetApp Files. In this scenario, what are three reasons for this issue?

(Choose three.)

- a) the automatic QoS quota size of the Azure NetApp Files volume 17
- b) the size of the compute instance
- c) a single root I/O virtualization (SR-IOV) driver in the compute instance with accelerated networking
- d) the number of snapshots to keep in the Azure NetApp Files volume snapshot policy
- e) a manual QoS throughput setting of the Azure NetApp Files volume

Answer: a, b, e

Question: 9

You are provisioning a single node NetApp Cloud Volumes ONTAP instance in the public cloud. In this scenario, which two LIFs are configured by Cloud Manager by default?

(Choose two.)

- a) cluster management LIF
- b) intercluster LIF
- c) Storage Virtual Machine (SVM) management LIF
- d) FC data LIF

Answer: a, b

Question: 10

Which two storage protocols are supported by Cloud Volumes Service?

(Choose two.)

- a) FCoE
- b) SMB 3.0
- c) NFS v3
- d) NVMe

Answer: b, c

Study Guide to Crack NetApp NCHC Administrator NS0-304 Exam:

- Getting details of the NS0-304 syllabus, is the first step of a study plan. This pdf is going to be of ultimate help. Completion of the syllabus is must to pass the NS0-304 exam.
- Making a schedule is vital. A structured method of preparation leads to success. A candidate must plan his schedule and follow it rigorously to attain success.
- Joining the NetApp provided training for NS0-304 exam could be of much help. If there is specific training for the exam, you can discover it from the link above.
- Read from the NS0-304 sample questions to gain your idea about the actual exam questions. In this PDF useful sample questions are provided to make your exam preparation easy.
- Practicing on NS0-304 practice tests is must. Continuous practice will make you an expert in all syllabus areas.

Reliable Online Practice Test for NS0-304 Certification

Make NWExam.com your best friend during your Hybrid Cloud Administrator exam preparation. We provide authentic practice tests for the NS0-304 exam. Experts design these online practice tests, so we can offer you an exclusive experience of taking the actual NS0-304 exam. We guarantee you 100% success in your first exam attempt if you continue practicing regularly. Don't bother if you don't get 100% marks in initial practice exam attempts. Just utilize the result section to know your strengths and weaknesses and prepare according to that until you get 100% with our practice tests. Our evaluation makes you confident, and you can score high in the NS0-304 exam.
