(Number of correct answers: 2)

- a) Brute force server password cracking
- b) Large-scale DDoS attacks
- c) Webshell implanting
- d) ChallengeCollapsar (CC) attacks

**Answer: b, d**

**Question: 5**

Which of the following Alibaba Cloud products can work with Server Guard?

- a) ECS
- b) SLB
- c) RDS
- d) OSS

**Answer: a**

**Question: 6**

In Alibaba Cloud, which service is specifically designed for large-scale data warehousing?

- a) MaxCompute
- b) ECS
- c) OSS
- d) RDS

**Answer: a**

**Question: 7**

What is a common feature of a WAF that helps in protecting against zero-day exploits?

- a) Signature-based detection
- b) Heuristic analysis
- c) IP whitelisting
- d) Bandwidth throttling

**Answer: b**

**Question: 8**

Anti-DDoS pro Service is a paid value-added service intended to address the problem of service interruptions caused by attacks by high DDoS traffic on Internet servers (including non-Alibaba Cloud hosts).

Users can configure a high protection IP address so that attacking traffic can be redirected to the IP address, thereby ensuring the stability and reliability of the origin site. When a user configures Anti-DDoS pro Service and imports an HTTPS certificate, the system prompts an "incorrect parameter format" error.

Which of the following is NOT the reason of this error?

- a) The certificate contains "----".
- b) The name of the certificate is Test\_Cer.
- c) The name of the certificate exceeds 10 characters.
- d) The certificate contains nonstandard content.

**Answer: c**

**Question: 9**

Which of the following attacks can Alibaba Cloud Anti-DDoS Basic defend against?

(Number of correct answers: 4)

- a) SYN Flood
- b) UDP Flood
- c) ACK Flood
- d) ICMP Flood
- e) Brute force password cracking

**Answer: a, b, c, d**

**Question: 10**

What does a Security Center typically use to detect anomalies and potential threats?

- a) Artistic design techniques
- b) Machine learning and AI algorithms
- c) Traditional marketing strategies
- d) Manual inspection by employees

**Answer: b**
