What is the effect of using the Agent.<AgentClassName>.checkDuplicates property at the agent class level?

- a) applies to all <AgentClassName> agents in the cluster
- b) applies to any <AgentClassName> agents deployed in the specified Processing Unit
- c) applies to any <AgentClassName> agents used in any Processing Unit
- d) applies to any <AgentClassName> agents in the project

**Answer: c**

**Question: 6**

Which two statements are true about local channel destinations? (Choose two.)

- a) Local channel destinations may use preprocessors.
- b) Local channel destinations must have a default event.
- c) Local channel destinations do not have a default event.
- d) Sending an event to a local destination is equivalent to asserting it to the working memory.

**Answer: a, c**

**Question: 7**

Event A and Event B are in scope. Event A has property ZZ and Event B has property YY. Both properties belong to the same data type. Using Decision Manager, you drag property ZZ to a condition column. For a new rule, you specify a value of b.YY in its cell. What is the intended action?

- a) to compare the value of property ZZ with the value of property YY
- b) to set the property YY to the value of ZZ
- c) to set the property of ZZ to the value of YY
- d) to overwrite the property ZZ with property YY

**Answer: a****Question: 8**

Which two statements are true about transitions in a State Model?

(Choose two.)

- a) When a transition crosses the boundary of one or more nested states, the entry or exit actions of those states are executed.
- b) When a transition crosses the boundary of one or more nested states, only exit actions of those states are executed./li>
- c) Composite states can optionally use boundary transitions but Concurrent states must use them./li>
- d) Concurrent states can optionally use boundary transitions but Composite states must use them.

**Answer: a, c****Question: 9**

An event was defined with Time to Live equal to 10 minutes. An instance of that event arrived from a JMS destination configured with EXPLICIT\_CLIENT\_ACKNOWLEDGE mode and was consumed in the preprocessor. When will the JMS message corresponding to this event be acknowledged?

- a) after 10 minutes
- b) immediately after the Event.consumeEvent call
- c) after the preprocessor finishes
- d) during the post RTC phase

**Answer: b**

**Question: 10**

Which two statements are true about a site topology file?

(Choose two.)

- a) It contains deployment information, mapping Processing Units to machines.
- b) It contains deployment information, such as JVM parameters and thread settings.
- c) It can only be edited in TIBCO BusinessEvents Studio.
- d) It can be edited in TIBCO BusinessEvents Studio or a Text Editor.

**Answer: a, d**
