Know Your S2000-019 Certification Well:

The S2000-019 is best suitable for candidates who want to gain knowledge in the IBM IBM Cloud - Cloud Solutions. Before you start your S2000-019 preparation you may struggle to get all the crucial Cloud for SAP Specialty materials like S2000-019 syllabus, sample questions, study guide.

But don't worry the S2000-019 PDF is here to help you prepare in a stress free manner.

The PDF is a combination of all your queries like-
- What is in the S2000-019 syllabus?
- How many questions are there in the S2000-019 exam?
- Which Practice test would help me to pass the S2000-019 exam at the first attempt?

Passing the S2000-019 exam makes you IBM Cloud for SAP v1 Specialty. Having the Cloud for SAP Specialty certification opens multiple opportunities for you. You can grab a new job, get a higher salary or simply get recognition within your current organization.

IBM S2000-019 Cloud for SAP Specialty Certification Details:

Exam Name	IBM Cloud for SAP v1 Specialty
Exam Code	S2000-019
Exam Price	$100 (USD)
Duration	75 mins
Number of Questions	44
Passing Score	66%
Books / Training	**IBM Cloud for SAP Specialty** **IBM Cloud Prep - SAP**
Schedule Exam	**Pearson VUE**
Sample Questions	**IBM Cloud for SAP Specialty Sample Questions**
Practice Exam	**IBM S2000-019 Certification Practice Exam**

S2000-019 Syllabus:

Topic	Details	Weights
SAP Workloads on IBM Cloud	- Define SAP terminology and basic concepts - Identify IaaS offerings for SAP on IBM Cloud - Identify applicable SAP workloads on IBM Cloud - Determine client goals and system requirements for SAP on IBM Cloud	19%
Architecture Considerations for SAP on IBM Cloud	- Differentiate High Availability requirements for a given SAP workload on IBM Cloud - Differentiate the available deployments to meet external regulatory requirements for SAP on IBM Cloud - Differentiate architectures to maintain SAP certification for productive use - Identify architectural automation capabilities for SAP on IBM Cloud	20%
Compute Comparisons for SAP on IBM Cloud	- Compare characteristics of potential compute platforms for an SAP workload running in IBM Cloud - Calculate compute to meet Performance Requirements for a given SAP workload on IBM Cloud - Consider compute use cases for SAP on IBM Cloud - Determine the appropriate compute platform for a given SAP workload	11%
Storage Considerations for SAP on IBM Cloud	- Identify storage considerations for SAP HANA on IBM Cloud - Select the appropriate Data Migration strategy for a given SAP workload to IBM Cloud - Identify backup strategy for SAP on IBM Cloud	11%
Networking Design Considerations for SAP on IBM Cloud	- Determine appropriate networking for SAP on Bare Metal and VMware - Determine appropriate networking for SAP on Virtual Servers - Determine appropriate networking for SAP on Power Virtual Server	11%
Security	- Identify network isolation options for SAP	14%

Topic	Details	Weights
Considerations for SAP on IBM Cloud	HANA - Define network firewall rules for SAP HANA to SAP NetWeaver - Differentiate between sSecurity at the eEdge options in relation to SAP workloads - Select the appropriate encryption option for data in an SAP application	
Business Transformation for SAP on IBM Cloud	- Identify use cases in relation to SAP workloads on IBM Cloud - Identify business opportunity use cases	14%

IBM S2000-019 Sample Questions:

Question: 1

The ability to scale-out an SAP deployment is an important factor to consider when deciding on an SAP platform. When defining an architecture on IBM Cloud, what is the correct definition of scale-out?

a) Ability to combine multiple independent computers into one instance and distribute a workload between the servers
b) Ability to increase the size of one physical machine by increasing the amount of random access memory (RAM)
c) Ability to combine multiple independent computers into one instance by leveraging a shared memory co-processor between the two systems
d) Ability to combine multiple instances into one instance and distribute a workload between the servers

Answer: a

Question: 2

A client wants their SAP workload to run on a dedicated server in the cloud. What are the recommended IBM Cloud SAP-certified servers?

a) Hyper Protect Virtual Server
b) Power Systems Virtual Server
c) VMware Solutions Dedicated
d) Bare Metal Servers for Classic
e) VMware Solutions Shared

Answer: c, d

Question: 3

What two resources can a client access to obtain SAP official information running SAP on IBM Cloud?

a) SAP Portal
b) IBM Catalog
c) IBM Cloud Docs
d) SAP Note
e) SAP Wikipedia

Answer: a, d

Question: 4

When deploying SAP on IBM Cloud, what are two examples of regional compliance programs?

a) Social Security
b) 401K
c) GDPR
d) Red Cross
e) European Banking Authority

Answer: c, e

Question: 5

Within IBM Cloud, what encryption option only works with IBM managed keys to encrypt the complete NFS volume for SAP application data?

a) vSphere encryption
b) HyTrust DataControl encryption
c) IBM Cloud Endurance native encryption
d) vSAN encryption

Answer: c

Question: 6

When deploying SAP on IBM Cloud, what is the SAP recommended throughput for traffic between its application servers and SAP HANA databases?

a) 100 Mbps (redundant) network
b) 10 Gbps (redundant) network
c) 1 Gbps (redundant) network
d) 1 Gbps network

Answer: b

Question: 7

What would be the advantage of running SAP within an IBM Cloud VPC?

a) VPC can be shutdown to reduce daily billing
b) Max 3 IOPS for storage
c) Network is free between VPCs in different regions
d) Dynamically provisioning of virtual servers

Answer: d

Question: 8

A client has SAP running on VMware on-premises. What product could migrate those workloads to the IBM Cloud without any conversion?

a) HCX
b) NSX-T
c) NSX-V
d) VSAN

Answer: a

Question: 9

In an IBM Cloud VPC migration when bringing VMDK or VHD image with SAP workloads, what are two prerequisites?

a) Virtual Server for VPC can import images automatically for flexibility
b) Windows needs declaration of environment variable for image conversion server
c) Additional infrastructure is needed for VMDK or VHD image conversion
d) No additional infrastructure is needed for VMDK or VHD image conversion
e) Only Linux support at this point, as Windows is considered for future enhancements

Answer: b, c

Question: 10

A client is requesting to run SAP on IBM Cloud. Which software must be obtained by the client?

a) Red Hat
b) SuSE
c) SAP
d) IBM

Answer: c

Study Guide to Crack IBM Cloud for SAP Specialty S2000-019 Exam:

- Getting details of the S2000-019 syllabus, is the first step of a study plan. This pdf is going to be of ultimate help. Completion of the syllabus is must to pass the S2000-019 exam.
- Making a schedule is vital. A structured method of preparation leads to success. A candidate must plan his schedule and follow it rigorously to attain success.
- Joining the IBM provided training for S2000-019 exam could be of much help. If there is specific training for the exam, you can discover it from the link above.
- Read from the S2000-019 sample questions to gain your idea about the actual exam questions. In this PDF useful sample questions are provided to make your exam preparation easy.
- Practicing on S2000-019 practice tests is must. Continuous practice will make you an expert in all syllabus areas.

Reliable Online Practice Test for S2000-019 Certification

Make EduSum.com your best friend during your IBM Cloud for SAP v1 Specialty exam preparation. We provide authentic practice tests for the S2000-019 exam. Experts design these online practice tests, so we can offer you an exclusive experience of taking the actual S2000-019 exam. We guarantee you 100% success in your first exam attempt if you continue practicing regularly. Don't bother if you don't get 100% marks in initial practice exam attempts. Just utilize the result section to know your strengths and weaknesses and prepare according to that until you get 100% with our practice tests. Our evaluation makes you confident, and you can score high in the S2000-019 exam.
