Oracle 1Z0-1048-24 Sample Questions:

Question: 1

A customer requires Oracle payroll validation to run when a user goes from the time entry page to the time card review page, and for all payroll time types to be part of the transfer to payroll.

Which two options should you use to configure this?

- a) Use a time consumer set containing the delivered time category of "all payroll plus absence entries" and set "Validate on time card actions" to Next.
- b) Use a time consumer set containing the delivered time category of "all payroll entries" and set "Validate on time card actions" to "Submit and save."
- c) Use a time consumer set containing the delivered time category of "all payroll entries" and set "Validate on time card actions" to Next.
- d) Use a time consumer set containing the delivered time category of "all payroll entries" and set "Validate on time card actions" to "Submit only."
- e) Use a time consumer set containing the delivered time category of "all payroll plus absence entries" and set "Validate on time card actions" to "Submit and save."

Answer: b, c

Question: 2

What is the correct sequence of steps that you should perform to set multiple time attributes for different user groups?

- a) Configure the time attributes > Define the single-attribute time card field > Assign to the time entry profile.
- b) Configure the time attributes > Define the multiple-attribute time card field > Assign to a layout set > Assign to the time entry profile.
- c) Configure the time attributes > Define the multiple-attribute time card field > Assign to the time entry profile.
- d) Configure the time attributes > Define a custom value set > Define the single-attribute time card field > Assign to a layout set > Assign to the time entry profile.

Answer: b

Question: 3

Your customer has implemented Fusion Payroll and defined a set of elements and CIRs (Calculation Information Repository) with restricted element eligibility.
How should you restrict the displayed payroll time types to match the payroll element eligibility?

- a) The payroll elements are placed in several multiple-attribute time card fields and the layout set is assigned by using the time entry profile.
- b) The payroll elements are placed in one multiple-attribute time card field and the layout set is assigned by using the time entry profile.
- c) The payroll elements are placed in one multiple-attribute time card field and restricted by using the enabled value.
- d) The payroll element eligibility definition is automatically used to restrict the displayed values on the time card.

Answer: b**Question: 4**

Which is not a predefined approval task and task rule for payroll and project costing time entry approvals?

- a) a Payroll Time Card Approval task that routes payroll time entries to the Line Manager if the total hours for a time card exceed 40 hours
- b) a Payroll Time Card Approval task that automatically approves the time card unless it contains absences
- c) a Project Time Card Approval task that routes time cards that contain time entries with a reported project, task, and expenditure type to the appropriate Project Manager
- d) a Payroll Time Card Approval task that automatically approves the time card if the total hours for time entries is 40 hours or less

Answer: b**Question: 5**

How do you configure a time submission rule set used with time devices?

- a) Manage Time Submission Rule Set and add the submission rules to the set.
- b) Every time you associate a time submission rule with the processing profile, the add action creates a corresponding rule set.
- c) Use the time device import process to add time submission rules to the rule set.
- d) Every time you create a time submission rule, the save action also created a corresponding rule set.

Answer: d

Question: 6
