Discover More about the JN0-637 Certification

Are you interested in passing the Juniper JN0-637 exam? First discover, who benefits from the JN0-637 certification. The JN0-637 is suitable for a candidate if he wants to learn about Junos Security. Passing the JN0-637 exam earns you the Juniper Networks Certified Professional Security title.

While preparing for the JN0-637 exam, many candidates struggle to get the necessary materials. But do not worry; your struggling days are over. The JN0-637 PDF contains some of the most valuable preparation tips and the details and instant access to useful [JN0-637 study materials just at one click](#).

Juniper JN0-637 JNCIP Security Certification

Details:

Exam Name	Security Professional
Exam Number	JN0-637 JNCIP-SEC
Exam Price	\$400 USD
Duration	90 minutes
Number of Questions	65
Passing Score	Variable (60-70% Approx.)
Recommended Training	Advanced Juniper Security
Exam Registration	PEARSON VUE
Sample Questions	Juniper JN0-637 Sample Questions
Practice Exam	Juniper Networks Certified Professional Security Practice Test

JN0-637 Syllabus:

Section	Objectives
Troubleshooting Security Policies and Security Zones	- Given a scenario, demonstrate how to troubleshoot or monitor security policies or security zones. • Tools • Logging or tracing • Other outputs
Logical Systems and Tenant Systems	- Describe the concepts, operations, or functionalities of logical systems. • Administrative roles

Section	Objectives
	• Security profiles • Logical system communication - Describe the concepts, operations, or functionalities of tenant systems. • Primary system and tenant system administrators • Tenant system capacity
Layer 2 Security	- Describe the concepts, operations, or functionalities of Layer 2 Security. • Transparent mode • Mixed mode • Secure wire • MACsec • Ethernet VPN-Virtual Extensible LAN (EVPN-VXLAN) security - Given a scenario, demonstrate how to configure or monitor Layer 2 Security.
Advanced Network Address Translation (NAT)	- Describe the concepts, operations, or functionalities of advanced NAT. • Persistent NAT • Domain Name System (DNS) doctoring • IPv6 NAT - Given a scenario, demonstrate how to configure, troubleshoot, or monitor advanced NAT scenarios.
Advanced IPsec VPNs	- Describe the concepts, operations, or functionalities of advanced IPsec VPNs. • Hub-and-spoke VPNs • Public Key Infrastructure (PKI) • Auto discovery VPNs (ADVPNs) • Routing with IPsec • Overlapping IP addresses • Dynamic gateways • IPsec Class of Service (CoS) - Given a scenario, demonstrate how to configure, troubleshoot, or monitor advanced IPsec VPNs.
Advanced Policy-Based Routing (APBR)	- Describe the concepts, operations, or functionalities of advanced policy-based routing. • Profiles

Section	Objectives
	• Policies • Routing instances • APBR options - Given a scenario, demonstrate how to configure or monitor advanced policy-based routing.
Multinode High Availability (HA)	- Describe the concepts, operations, or functionalities of multinode HA. Concepts • Chassis cluster versus multinode HA • Deployment modes • Services redundancy group (SRG) • Interchassis link • Active/active mode • Active/passive mode • Active node behavior (determination and enforcement) - Given a scenario, demonstrate how to configure or monitor multinode HA.
Automated Threat Mitigation	- Describe the concepts, operations, or functionalities of Automated Threat Mitigation. • Third-party or multicloud integration • Secure Enterprise

Broaden Your Knowledge with Juniper JN0-637 Sample Questions:

Question: 1

After downloading the new IPS attack database, the installation of the new database fails. What caused this condition?

- The new attack database no longer contained an attack entry that was in use.
- The new attack database was too large for the device on which it was being installed.
- The new attack database was revoked between the time it was downloaded and installed.
- Some of the new attack entries were already in use and had to be deactivated before installation.

Answer: a

Question: 2

Which two additional configuration actions are necessary for the third-party feed shown in the exhibit to work properly? (Choose two.)

- a) You must create a dynamic address entry with the IP filter category and the ipfilter_office365 value.
- b) You must apply the dynamic address entry in a security policy.
- c) You must apply the dynamic address entry in a security intelligence policy.
- d) You must create a dynamic address entry with the C&C category and the cc_offic365 value.

Answer: a, b

Question: 3

You want to use selective stateless packet-based forwarding based on the source address. In this scenario, which command will allow traffic to bypass the SRX Series device flow daemon?

- a) set firewall family inet filter bypas3_flowd term t1 then virtual-channel stateless
- b) set firewall family inet filter bypaa3_flowd term t1 then skip-services accept
- c) set firewall family inet filter bypass__f lowd term t1 then packet-mode
- d) set firewall family inet filter bypass_flowd term t1 then routing-instance stateless

Answer: b

Question: 4

Which Junos security feature is used for signature-based attack prevention?

- a) RADIUS
- b) AppQoS
- c) IPS
- d) PIM

Answer: c

Question: 5

What is a function of UTM?

- a) content filtering
- b) AppFW
- c) IPsec
- d) bridge mode

Answer: a

Question: 6

Which two statements are true about ADVPN members? (Choose two.)

- a) ADVPN members are authenticated using certificates.
- b) ADVPN members are authenticated using pre-shared keys.
- c) ADVPN members can use IKEv2.
- d) ADVPN members can use IKEv1.

Answer: a, c

Question: 7

You are deploying a virtualization solution with the security devices in your network. Each SRX Series device must support at least 100 virtualized instances, and each virtualized instance must have its own discrete administrative domain.

In this scenario, which solution would you choose?

- a) VRF instances
- b) virtual router instances
- c) logical systems
- d) tenant systems

Answer: c

Question: 8

All interfaces involved in transparent mode are configured with which protocol family?

- a) ethernet - switching
- b) inet
- c) bridge
- d) mpls

Answer: d

Question: 9

How does secure wire mode differ from transparent mode?

- a) In secure wire mode, traffic can be modified using source NAT.
- b) In secure wire mode, no switching lookup takes place to forward traffic.
- c) In secure wire mode, security policies cannot be used to secure intra-VLAN traffic.
- d) In secure wire mode, IRB interfaces can be configured to route inter-VLAN traffic.

Answer: b

Question: 10

In an effort to reduce client-server latency transparent mode was enabled on an SRX series device. Which two types of traffic will be permitted in this scenario?

(Choose Two.)

- a) ARP
- b) Layer 2 non-IP multicast
- c) BGP
- d) IPsec

Answer: a, b

Avail the Study Guide to Pass Juniper JN0-637 JNCIP Security Exam:

- Find out about the JN0-637 syllabus topics. Visiting the official site offers an idea about the exam structure and other important study resources. Going through the syllabus topics help to plan the exam in an organized manner.
- Once you are done exploring the [JN0-637 syllabus](#), it is time to plan for studying and covering the syllabus topics from the core. Chalk out the best plan for yourself to cover each part of the syllabus in a hassle-free manner.
- A study schedule helps you to stay calm throughout your exam preparation. It should contain your materials and thoughts like study hours, number of topics for daily studying mentioned on it. The best bet to clear the exam is to follow your schedule rigorously.
- The candidate should not miss out on the scope to learn from the JN0-637 training. Joining the Juniper provided training for JN0-637 exam helps a candidate to strengthen his practical knowledge base from the certification.
- Learning about the probable questions and gaining knowledge regarding the exam structure helps a lot. Go through the [JN0-637 sample questions](#) and boost your knowledge
- Make yourself a pro through online practicing the syllabus topics. JN0-637 practice tests would guide you on your strengths and weaknesses regarding the syllabus topics. Through rigorous practicing, you can improve the weaker sections too. Learn well about time management during exam and become confident gradually with practice tests.

Career Benefits:

Passing the JN0-637 exam, helps a candidate to prosper highly in his career. Having the certification on the resume adds to the candidate's benefit and helps to get the best opportunities.

Here Is the Trusted Practice Test for the JN0-637 Certification

NWExam.com is here with all the necessary details regarding the JN0-637 exam. We provide authentic practice tests for the JN0-637 exam. What do you gain from these practice tests? You get to experience the real exam-like questions made by industry experts and get a scope to improve your performance in the actual exam. Rely on NWExam.com for rigorous, unlimited two-month attempts on the [JN0-637 practice tests](https://www.nwexam.com/juniper/jn0-637-juniper-security-professional-jncip-sec), and gradually build your confidence. Rigorous practice made many aspirants successful and made their journey easy towards grabbing the Juniper Networks Certified Professional Security.
